INTRODUCTORY NOTE.

IT is hoped that this Waziri Grammar and Vocabulary may be of some assistance to officers who, after acquiring the Pashto of Peshawar, are brought into contact with the Waziris of the Bannu District or of Waziristan. The difference between the Waziri and Peshawar varieties of Pashto is hardly less than that which separates broad Scots from cockney English, and like it extends to grammar and idiom as well as to vocabulary.* A Pathan of the northern border lately arrived in the Waziri country, is far from understanding all that he hears, and cannot always make himself understood by the ordinary villager. After a short time, he is able to converse freely with Waziris; but he never acquires a perfect command of Waziri, in spite of its close relationship to his mother tongue. The difficulty to a British officer is of course much greater, even if he has a good knowledge of Peshawar Pashto; and if he wishes to attain even a moderate degree of correctness in speaking Waziri, he must study it almost as he would a new language and abandon the idea that a few changes in pronunciation, or even in accidence, will make his Peshawar Pashto intelligible to the ordinary Waziri tribesman. There is no fixed formula, even in the comparatively simple matter of pronunciation, by which the one variety of the language can be mechanically converted into the other. The result of treating Waziri as a

* Some of the commonest words in the Peshawar dialect have no counterpart in Waziri, *e.g.*, byêl, *separate*, of which the Waziri is gwushai; prānastel, *to open*, Waziri, khalos kṛel. Even the adjective loé, *great*, does not exist in Waziri proper and it is not understood by the less civilised among the Waziris.

(c) ketabton.com: The Digital Library

modification, according to a few general rules,* of Peshawar Pashto would consequently be a jargon not spoken by any tribe.

While the Waziri dialects differ, as a family, in a marked degree from the Peshawar and other dialects of Pashto, they also differ to a less extent among themselves. These variations, however, do not appreciably impede communication between Waziris of different tribes, and may be regarded as of little practical importance. In this Grammar and Vocabulary the dialect of the Mohmit Khel Waziris of the Middle Tochi has been taken as the standard; but the book has been compiled from many sources, and Dauri, Mahsud, and other elements will, no doubt, be found in it. In fact, it would be impossible to distinguish and keep separate the different Waziri dialects,† which shade into each other imperceptibly and vary from tribe to tribe, and even from section to section. The dialect of families of the same clan which have been separated for some generations is often not the same. Pronunciation varies almost from village to village,‡ and so great is the confusion that even the same man will sometimes pronounce the same word in different ways. Strange to say, the Mahsud and Wano

* There are, however, a few general rules, but they are of uncertain and irregular application; *e.g.*, the b, m, n, k and w of Peshawar Pashto often become w, w, l, kw and y in Waziri Pashto. Thus the Peshawar words bégā, *evening*, mélma, *guest*, ngharé, *fire-place*, kunḍa, *widow*, and nwar, *sun*, become in Waziri Pashto wégā, wulma, lgharai, kwunḍa and myèr or lmèr. The last word is an excellent illustration of the uncertainty attending these conversions. The name Anwar becomes Almar. An n is frequently inserted after a vowel in Waziri, as mandat, for madad, *help*. Words beginning with a vowel in Peshawar Pashto often begin with y in Waziri Pashto; thus, obe and yébö, *water*. In this respect some varieties of Lowland Scottish furnish an analogy: *e.g.*, the dialect of the Ettrick Shepherd in the "Noctes Ambrosianae," who calls an epic, a yepic, and the earth, yearth. As regards correspondence of vowels, see last footnote on this page.

† Thus in the Bannu district alone there are at least three ways of saying "I will not." A Hathi Khel says "Dā kissa wa na wukaṇ"; a Sperkai says "Dā kissa wa na wukaṇ dai"; and an Umarzai says "Dā kissa wa na wukaṇ kruzh."

‡ So in Bannu the word for a bullet is "golai," and a Bannu Waziri will sometimes fail to recognise it if pronounced "gélai" as in Tochi. To speak generally, the ā and ū of standard Pashto are represented for the most part by o and ī respectively in the Waziri dialects. The o of standard Pashto and of the Mahsud dialect is frequently represented by ö in the Darwesh Khel dialects and by é in Dauri. Again, è frequently occurs in Dauri where o is found in standard Pashto, in the Mahsud dialect and even in the dialects of the Darwesh Khel. There is, however, no consistent rule of transmutation.

(c) ketabton.com: The Digital Library

Darwesh Khel varieties of Waziri Pashto, while resembling the others in grammar and vocabulary, differ considerably less from the Pashto of Peshawar in pronounciation.

A few words are necessary to explain the phonetic system employed in this book. Waziri Pashto is seldom or never written, the correspondence of the people being carried on through letter-writers, chiefly mullahs, in Hindustani or execrable Persian. The Arabic character, which has only the means of expressing eight vowel sounds, *viz.*, *a*, *ā*, *i*, *ī*, *u*, *ū*, *au*, and *ai*, is entirely unsuited to be the vehicle of a tongue so rich in vowels as Waziri. The close connection, in the Arabic character, between the consonantal sounds *w* and *y* and certain of the long vowels and diphthongs is an additional disadvantage. Thus the Dauri word *yīyé*, eggs, could only be expressed in Arabic characters by repeating the same symbol four times, *yyyy*, minute diacritical marks (one of which does not exist in Arabic itself) being added to indicate the variation of sound. The superiority of the Roman character as the literary medium of Waziri, or indeed of any dialect of Pashto, is so obvious as to require no further demonstration.

The values of the characters which occur in the following Grammar and Vocabulary are as follow :—

Vowels.—A = U in but, cut.
Ā = A in bar, far.
E = E in water, barber.
É = AY in day, say.
È = AI in fair, hair.
Ê = E in met, set.
I = I in bit, sit.
Ī = EE in feet, meet.
O = O in note, rote.
Ö = EU in French beurre.
U = U in put.
Ū = U in crude.
Ü = Ü in German sünde.
AI = I in rice, mice.
AU = OW in now, cow.

(c) ketabton.com: The Digital Library

The other double vowels are not true diphthongs: in AO, IA, IO, OI, etc., each vowel is pronounced separately in the ordinary way. The equivalents given in the above table are approximate only, and the true sounds must be learnt, in conversation, from Waziris. There are really two sounds of O, and the illustrations given of the sounds Ê and AI are not quite exact. The sound Ö passes by an easy gradation into È, and Ü into Ï.

Consonants.—The consonants, except so far as they call for remark and are mentioned below, are the same as in English. C and X are not required. The former when soft is represented by S and when hard by K; the latter is represented by KS. Q is not found, the place of QU being supplied by KW.

CH is pronounced as in English, and is not underlined because it already exists in English as a double letter.

D is a soft dental D which does not occur in English.

DZ is pronounced as spelt, and has been underlined and treated as a single letter for etymological reasons only.

Ḍ is the ordinary D of the English language, only harder and more palatal.

GH is a guttural sound, intermediate between G and R, which has no equivalent in English.

KH is pronounced as CH in the Scottish words loch, Auchtermuchty.

Ṇ is a nasal pronounced like N in the French bon, ton, but less strongly. It is sometimes scarcely perceptible.

NR is an indescribable nasal.

Ṛ is a palatal R which does not exist in English.

SH is pronounced as in English, and is not underlined because it already exists in English as a double letter.

T is a soft dental T not found in English.

(c) ketabton.com: The Digital Library

TS is pronounced as spelt, and has been underlined and treated as a single letter for etymological reasons only.

Ṭ is the English T, but harder and more palatal.

W and Y have the same consonantal sounds as in English and are never used as vowels. In a number of words W is interchangeable with V.

ZH is the sound represented in French by J, as in je, j'ai.

If the reader will take the trouble to master thoroughly the meaning of these symbols, he will be able to pronounce at once, with fair correctness, any word he finds in this book, a result which could not have been attained if the Arabic character had been employed.

There is a variable, and sometimes marked, syllabic emphasis in the Waziri dialect; but no attempt has been made in the vocabulary to indicate the syllables on which this accent falls, partly to avoid complicating the system of notation, and partly because the correct emphasis can most conveniently be acquired in conversation.

The writer regrets that he has not found it possible to deal with the derivation of words; to point out, for example, that *moghsitan*, evening prayer, (Peshawar Pashto, *māz-khutan*) has obviously, in spite of the want of resemblance, come from the Persian *namāz-i-khuftan;* to consider whether *marakka*, a tribal council, is a corruption of the Arabic *ma'raka*, field of battle, hence council of war, or other council; or to discuss the identity of *bayīr*, a caravan, with *ba'īr*, one of the Arabic words for a camel. Similarly he has been unable to enlarge on certain interesting indications,—such as the common use of the archaic compound preposition *wa . . . ta*,* the full inflection for gender and number of the

* The preposition wa . . . ta is unknown in modern Peshawar Pashto, but occurs freely in the Diwan of Khushal Khan, Khatak, who died in 1691 A.D., and in the works of Abdur Rahman, his younger contemporary.

(c) ketabton.com: The Digital Library

past participle in compound tenses, and the comparative fewness of words of foreign origin,*—which might be held to show that Waziri is a more pure and consistent form of the language, and less distantly removed from the speech of the original Pathans,† than the now standard dialect of Peshawar.‡

The present book was begun in Tochi, but a great part of it has been written at a distance from the frontier. The writer hopes that this fact, added to the difficulty of compiling a first text-book in any new dialect, may be accepted as a sufficient excuse for the inaccuracies which will, no doubt, be discovered by those who may make use of it in their daily dealings with Waziris. The differences of dialect prevailing among the Waziris themselves should be borne in mind in criticising apparent mistakes.

An apology is due to the reader for the bluntness of a few of the expressions introduced into the vocabulary : the explanation is that they, like almost all the phrases which the book contains, were taken from the lips of living Waziris and are characteristic.

The writer is mainly indebted for the materials of this book to Maliks Khair Muhammad, Hathi Khel of Bannu, Gul Husen, Mohmit Khel of Tal, Nabbi Khan, Madda Khel

* There are, however, a few remarkable adaptations of Urdu words, such as bẹṭai, *piece of meat*, led, *horse-dung*, mantar, *a charm*, and wesh, *poison*.

† It has been suggested that such forms as ko from the verb kṛel rather show Waziri to be a worn-down and degenerate dialect. To refute this idea it is sufficient to refer to the language of Scotland, admittedly more primitive than modern English, but nevertheless having some words apocopated which are not apocopated in English, *e.g.*, sma' for small, wa', for wall. Worn-down forms are, moreover, rare in Waziri.

‡ Another point worthy of investigation is the relation of the Waziri, or any other Pashto dialect, to the languages of Europe. The following resemblances to English may be noticed : arwédel, *to hear* ; ghuṇd, *round* ; kaṭ, *small bed* or *cot* ; kok, *cake* ; leke, *like* ; newai, *new* ; stŏrai, *star* ; tandar, *thunder-bolt* ; wīvd, *weaved* or *wove* ; wula, *willow*. Compare also the suffix -sé, *so*, in haghasé, etc. Mèr *mother*, is pronounced exactly like the French mère, and kuna may be compared with the Latin cunnus. Although Waziri Pashto belongs to the same family as most of the languages of Europe, being an Indo-Iranian dialect, these resemblances are in some cases so close as to suggest the idea of their being accidental. Difference according to fixed rules would have been more noteworthy : possibly a formula might be discoverable by a competent philologist.

of the Kazha, and to Sai Muhammad, brother of Malik Khan Muhammad, Dawar, of Muhammad Khel. He also desires to express his acknowledgments to Tahsildar Ahmad Din and Naib-Tahsildar Muhammad Hayat Khan of the Tochi.

WAZIRI GRAMMAR.

AS few persons who have not already a working knowledge of ordinary Pashto are likely to undertake the study of the Waziri dialect, the following sketch of Waziri grammar assumes some acquaintance on the part of the reader with the general principles of Pashto grammar and is designed chiefly to indicate the points of difference between the Peshawar and Waziri dialects. The student is recommended first to run through the grammar and next to study carefully the vocabulary (which was originally written as a phrase book), referring back to the grammar for an explanation of all inflections, etc., which he does not understand. He may then re-peruse the grammar more thoroughly and analyse the Waziri specimens given in the first and second appendices.

THE NOUN.

Gender.

Waziri nouns are of two genders, masculine and feminine. The names of males are masculine; of females, feminine; and of things, either masculine or feminine. Masculine nouns generally terminate in a consonant or in the diphthong **ai** (corresponding to the Peshawari **é**), while the great majority of feminine nouns end in **a**, and a considerable number in **ai** (corresponding to the Peshawari **ai**). Other less common terminations of masculine nouns are **a, ā, aṇ, au, e, ī** and **o**; of feminine nouns, a consonant, **ā, aṇ, é, ī, o, ō**, and **yé**.

Number and Case.

There are two numbers, singular and plural; and two cases, nominative and oblique. The oblique case is that governed by a preposition or used to express the agent when the verb is active and employed in the past tense. The numbers and cases are marked by inflections; but it may be noted that in Waziri there is a strong tendency, especially in

(c) ketabton.com: The Digital Library

some* declensions, to abolish the plural and substitute for it the singular used in a collective sense; thus a Waziri says, É mo tīl melkhī khwaṛelai dai, *the locusts have*, lit. *the locust has, eaten up my green crops.*

Masculine Declensions.

(1) Masculine nouns ending in a consonant.—In all of these the oblique singular is either the same as the nominative singular or formed from it by adding an **-a,** which appears to be discretionary and merely euphonic: thus, De plor vrör, or, De plora vrör, *half-brother.* The cases of the plural are formed in one of three ways: first, by adding to the stem nothing for the nominative plural, and **-é** for the oblique plural; second, by adding **-on** for the nominative plural, and **-oné** for the oblique plural; third, by adding **-īna** for the nominative plural, and **-īné** or **-é** for the oblique plural. The first of these varieties of the declension is general, including the names of human beings, animals and things; the second consists chiefly of the names of human beings, but includes a few names of animals; while the third is composed chiefly of names of things with, however, a few names of animals and even of human beings. This first masculine declension may accordingly be divided into a general, an animate and an inanimate class, each class being named according to the kind of noun which preponderates in it. It may be remarked here that in the oblique plural of the inanimate class of this declension the terminations **-īné** and **-é** appear to be almost interchangeable, but that with certain words one of them is preferred to the other.

The following table illustrates the above remarks:—

	Meaning.	Nominative singular.	Oblique singular.	Nominative plural.	Oblique plural.
I	*Mahsud,*	Mahsīd,	Mahsīd,	Mahsīd,	Mahsīdé.
	animal,	dzanāwar,	dzanāwar,	dzanāwar,	dzanāwaré.
	hand,	los,	los,	lòs,	losé.
II	*holy man,*	ākhwund,	ākhwund,	ākhwundon,	ākhwundoné.
	camel,	yīsh,	yīsh,	yīshon,	yīshoné.
III	*politeness,*	adab,	adab,	adabīna,	adabīné.
	pilgrimage	āj,	āj,	ājīna,	ājīné.
	deed,	amal,	amal,	amalīna,	amalé.
	horse,	wos,	wos,	wosīna,	†wosīné.
	father,	plor,	plor,	plārīna,‡	plāré.

* See especially masculine declensions (4) and (6).

† Also wosé .

‡ See remarks on euphonic vowel changes on the next page.

(c) ketabton.com: The Digital Library

A few words belonging to this declension are irregular and may almost be considered to form two additional classes, the nature of which will be apparent from the following examples :—

	Meaning.	Nominative singular.	Oblique singular.	Nominative plural.	Oblique plural.
IV	*walnut,*	maṭak,	maṭak,	maṭek,	maṭeké.
	shi kari,	shkorzan,	shkorzan,	shkorzen,	shkorzené.
V	*ram,*	mazh,	mzhe,	mzhe,	mzhé.
	he-goat,	wez,	wze,	wze,	wzé.

All varieties of this declension are liable to certain euphonic vowel changes, which do not appear to follow any fixed rule; examples are :—

Meaning	Nominative singular.	Oblique singular.	Nominative plural.
leopard,	prong,	prong,	prāngon.
wing,	par,	par,	prīna.
thigh,	vrīn,	vrīn,	vrānīna.
intelligence,	akal,	akal,	aklīna.
snake,	mangèr,	mangora,	mangarīna.
entrail,	laṛmīn,	laṛmīn,	laṛmanīna.
rain,	wör,	wora,	warīna.

Yīshbön, *camel-man,* makes oblique singular yīshbona, nominative plural yīshbona, oblique plural yīshbāné, and ghobön, *cow-herd,* meshbön, *buffalo-herd,* and wazbön, *goat-herd,* are similarly declined. Shpün, *shepherd,* makes shpona, shpona, shpāné.

The difficulty of this declension is further increased by the fact that the same word may, in some cases, be declined in more than one way; thus los makes a plural losīna besides that of los, already given, dzanāwar makes dzanāwaron as well as dzanāwar, and wez, wzīna as well as wze.

There is no test by which a word belonging to this declension can be assigned to its proper class; the matter is one of usage and must be studied as such.

(2) Masculine nouns ending in -ai.—This declension includes both common and abstract nouns : the latter when used in a strictly abstract sense have no plural. There are two varieties of this declension. In the first, the oblique singular and the nominative plural are both formed by substituting **-ī** for the **-ai** of the nominative singular, and the oblique plural by substituting **-yé** or by retaining **-ai.** In the second and less common variety the oblique singular is formed in the same way, by substituting **-ī** for the **-ai** of the nominative, but the

nominative and oblique of the plural are formed by substituting **-ion** and **-ioné** respectively : examples are :—

	Meaning.	Nominative singular.	Oblique singular.	Nominative plural.	Oblique plural.
I	*village,*	kelai,	kelī,	kelī,	kelyé.
	bracelet,	chīlai,	chīlī,	chīlī,	chīlyé.
	wife's brother,	wokhshai,	wokhshī,	wokhshī,	wokhshyé.
	man,	saṛai,	saṛī,	saṛī,	saṛai.
	field,	wéshkai,	wéshkī,	wéshkī,	wéshkai.
	beauty,	kshelwolai,	kshelwolī,	(*wanting*),	(*wanting*).
II	*fairy,*	pèrai,	pèrī,	pèrion,	pèrioné.
	palate,	towlai,	towlī,	towlion,	towlioné.
	well,	kīyai,	kīyī,	kīyon, (*for* kīyion),	kīyoné. (*for* kīyioné).

No means can be prescribed of distinguishing which masculine nouns in **-ai** belong to the first, and which to the second class ; nor is it possible to formulate any rule for selecting the inflection proper to any given word from the two inflections of the oblique plural of the first class, **-yé** and **-ai.**

The words Khudai, *God,* and pai, *milk,* are indeclinable and invariable, while shai, *thing,* makes shī, shaiyīna, shaiyé.

(3) Masculine nouns ending in -a are declined as follows :—

Meaning.	Nominative singular.	Oblique singular.	Nominative plural.	Oblique plural.
dependent,	hamsāya,	hamsāya,	hamsāyagon,	hamsāyagoné.
Hindu converted to Muhammadanism,	parācha,	parācha,	parāchagon,	parāchagoné.

The word mīaṇ, *holy man,* though ending in a semi-nasal, comes under this declension and forms mīaṇ, mīagon, mīagoné.

(4) Masculine nouns ending in -ā and **-au** are inflected as in the following examples :—

Meaning.	Nominative singular.	Oblique singular.	Nominative plural.	Oblique plural.
evening,	wègā,	wégā,	wégāīna,	wégāīné.
fault,	gunā,	gunā,	gunāīna	gunāé *or* gunāīné.
reaping,	lau,	lau,	lauīna,	lauīné *or* laué.

It will be observed that in this declension also some uncertainty prevails as to the inflection of the oblique plural. Some words have a nominative plural identical with their nominative singular ; thus maṇḍau is used both for *furnace* and *furnaces.* The word bādshā, *king,* makes its plural bādshāon, or bādshāyon.

(c) ketabton.com: The Digital Library

(5) Masculine nouns ending in -e are of two kinds; first, those grammatically singular, and, second, those grammatically plural. Examples of each class are given below:—

	Meaning.	Nominative singular.	Oblique singular.	Nominative plural.	Oblique plural.
I	*spike,*	* nakẖashe,	nakẖashe,	†nakẖashīna,	nakẖashīné.
	family,	kole,	kole,	kālīna,	kālīné *or* kolé.
	deer,	pse,	pse,	psīna,	psīné *or* psé.
	marriage,	wode,	wode,	wādīna,	wādīné *or* wādé.
II	*curds,*	(*wanting*),	(*wanting*),	moste,	masté.
	dough,	(*wanting*),	(*wanting*),	èṛe,	èṛé.

Various euphonic vowel changes will be noted among the above examples. The word boṉṛe, *eyelash,* is invariable except in the oblique plural which is boṉṛé, while woshe, *grass,* is plural and invariable. Soṛe, *cold,* has no plural.

(6) Masculine nouns ending in -ī are divided into two classes corresponding to III and II of masculine declension (1); some examples follow:—

	Meaning.	Nominative singular.	Oblique singular.	Nominative plural.	Oblique pural.
I	*smell,*	bī,	bī,	bīyīna,	bīyīné *or* bīyé.
	disposition,	kẖī	kẖī,	kẖīyīna,	kẖīyé.
II	*nomad,*	kīchī,	kīchī,	kīchion,	kīchioné.
	camp,	īrdī,	īrdī,	īrdion,	īrdioné.

By a euphonic change skéī, *embroidery,* makes its plural skaīna.

In this declension, as in masculine declension (4), the nominative plural is occasionally the same as the nominative singular, *e.g.*, kwundī, *mirage* or *mirages.*

(7) Masculine nouns ending in -o are invariable in the singular, and form the nominative and oblique plurals by the addition of **-yon** and **-yoné** respectively. Such are:—

Meaning.	Nominative singular.	Oblique singular.	Nominative plural.	Oblique plural.
Muhammadan priest,	mullo,	mullo,	mulloyon,	mulloyoné.
friend,	āshno,	āshno,	āshnoyon,	āshnoyoné.

(8) There are a few masculine nouns in **-aṇ** not included in the above declensions: some of them which are abstract, as dréamwolaṇ, *arbitration,* are invariable; while the remainder may probably all be declined like ḍellaṇ, *dwarf-palm, viz.,* ḍellaṇ, ḍellaṇ, ḍellīna, dellīné.

* Also nakẖash. † Also nakẖashī.

Irregular Masculine Nouns.—The following masculine nouns which are irregular, or appear so in consequence of marked euphonic changes, should be noted :—

Meaning.	Nominative singular.	Oblique singular.	Nominative plural.	Oblique plural.
place,	dzöī *or* dzī,	dzöī *or* dzī,	dzāyīna,	dzāyīna, dzāyīné *or* dzāyé.
sister's son,	khwaryéī,	khwaryéī,	khoréyīna,	khoréyé.
prayer,	lmīnz,	lmonza,	lmanzīna,	lmanzé.
mother's brother,	nyoiye,	nyoiye,	niyāyīna,	niyayīné *or* niyāyé.
Pathan,	Pashtīn,	Pashtona,	Pashtona,	Pashtāné.
cloth,	shöī,	shöī,	shöīna,	shöīné.
river,	toi, töi *or* téī,	toi *or* téī,	téyīna *or* toīna.	téyīné *or* téyé.

son,	zyai,	zéī, zéé *or* zoi.	zāmen,	zāmené.

Feminine Declensions.

(1) Feminine nouns ending in -a or **-ā** substitute **-é** for the **-a** or **-ā** of the nominative in all the other cases, *e.g.* :—

Meaning.	Nominative singular.	Oblique singular.	Nominative plural.	Oblique plural.
mouth,	khwula,	khwulé,	khwulé,	khwulé.
she-goat,	wza,	wzé,	wzé,	wzé.
theft,	ghlā,	ghlé,	ghlé,	ghlé.

Similarly a few feminine nouns which end in **-aṇ** as *water-channel,* wélaṇ, wélé, wélé, wélé.

(2) Feminine nouns ending in -ai are invariable; examples are :—

Meaning.	Nominative singular.	Oblique singular.	Nominative plural.	Oblique plural.
woollen-jacket,	shaṛai,	shaṛai,	shaṛai,	shaṛai.
gold coin,	ashrafai,	ashrafai,	ashrafai,	ashrafai.

(3) Feminine nouns ending in a consonant in the nominative singular form all the other cases by addition of **-é.** Thus :—

Meaning.	Nominative singular.	Oblique singular.	Nominative plural.	Oblique plural.
hand-mill,	méchan,	méchané,	méchané,	méchané.
needle,	sten,	stené,	stené,	stené.
flint,	bakar,	bakaré,	bakaré,	bakaré.

(4) Feminine nouns ending in -é *or* **-ö** in the nominative singular are invariable, *e.g.*,—

Meaning.	Nominative singular.	Oblique singular.	Nominative plural.	Oblique plural.
oath,	lé *or* lö,	lé *or* lö,	lĕ *or* lö,	lé, *or* lö.

The word ébö *or* yébö, *water,* is grammatically plural, and the oblique case is ébé or yébé.

(5) Feminine nouns ending in -ī in the nominative singular form all the other cases by substituting **-ai** for **-ī**. Many of them are abstract and have no plural. Thus :—

Meaning.	Nominative singular.	Oblique singular.	Nominative plural.	Oblique plural.
medicine,	dorī,	dorai,	dorai,	dorai.
purse,	mionī,	mionai,	mionai,	mionai.
want,	khworī,	khworai,	(*wanting*),	(*wanting*).

(6) Feminine nouns ending in -o in the nominative singular are invariable. A number of them are abstract and have no plural.

Meaning.	Nominative singular.	Oblique singular.	Nominative plural.	Oblique plural.
shame,	hayo,	hayo,	(*wanting*),	(*wanting*).
cloth,	khamto,	khamto,	khamto,	khamto.
plain,	sāṛo,	sāṛo,	sāṛo,	sāṛo.

(7) Feminine nouns ending in -yé are the same in all the cases.

Meaning.	Nominative singular.	Oblique singular.	Nominative plural.	Oblique plural.
ring,	gutyé,	gutyé,	gutyé,	gutyé.
bride,	nowyé,	nowyé,	nowyé,	nowyé.

Irregular Feminine Nouns.—The following feminine nouns are altogether irregular :—

Meaning.	Nominative singular.	Oblique singular.	Nominative plural.	Oblique plural.
sister,	khör,	khör,	khwāndyé,	khwāndyé.
daughter,	līr,	līr,	līṇṛa,	līṇṛé.
mother,	mör,	mör,	māndyé,	māndyé.
grand-mother,	nio,	nio,	niogoné,	niogoné.
daughter-in-law,	nzhör,	nzhör,	nzhāndyé,	nzhāndyé
aunt,	trör,	trör,	trāndyé,	trandyé.

Vocative Case.

Most nouns have a vocative case, which in the singular of masculine nouns is usually formed by adding **-a** and making such further euphonic changes of vowels as may be required :—

é plora !	*oh father !*	*from* plor.
é saṛaiya !	*oh man !*	*from* saṛai.
é zhenia !	*oh young man !*	*from* zhenai.

The difference of termination in the 2nd and 3rd examples appears to be due to the different incidence of the syllabic accent. In the plural of masculine nouns and in both numbers of feminine nouns the vocative appears to be identical with the oblique, *e.g.* é malikoné ! *oh maliks !*, é tarbré ! *oh cousins !* é shezé, *oh woman* (or *women*) !

Numeral Case.

Many Waziri nouns possess what may be called a numeral case. It is used after a numeral adjective and is formed by adding the termination **-a,** and making any vowel changes which euphony may require. Examples :—

Dwa sīka (*or* sīkīna) mi waheli dī, *I struck two blows* (*from* sīk).

Tsö ghīndiya (*or* ghīndī) ghalla di shewyé do ? *How many sacks of grain have you obtained ?* (*from* ghīndai).

Owa dzéya halolawel, *to cut the throat of in seven places* (*from* dzöi).

Special use of the Plural.

Names of solid substances and liquids are generally treated as grammatical plurals, *e.g.*, de mesé gélai, *a bullet of lead ;* de bangoré kīza, *a vessel of copper ;* reṭé sāṛé ébö, *terribly cold water ;* pai she dī, *the milk is good.*

Gender in relation to Size.

Connected words of different genders are frequently used to designate similar objects of different size. Where this is the case the masculine form denotes an object of large or considerable size, the ordinary feminine one of small size, and the intensive feminine a very small object. Thus kéṭ (*masc.*) means a fortified house or group of houses, kéṭa (*fem.*) a single room of a house, or a house consisting of a single room. Marghe (*masc.*) means a largish bird, margha (*fem.*) a smaller bird, and marghai (*intens. fem.*) a still smaller bird.

Masculine and Feminine Forms of the same word.

A masculine noun ending in a consonant may sometimes be converted into the corresponding feminine by the addition of an **-a** as in dzéṭ, *young he-buffalo,* dzéṭa, *young she-buffalo.* When the masculine ends in **-ai**

(c) ketabton.com: The Digital Library

the feminine may often be formed by substituting **-a** or **-yé** for the **-ai**; thus jīngai, *young he-camel*, jīnga, *young she-camel*; laugerai, *man reaper*, laugeryé, *woman reaper*: or occasionally by adding **-yé** to the masculine as, shoipèrai, *male fairy*, shoipèraiyé, *female fairy*.

Significant Terminations.

The termination **-kai** or **-gai** generally has the force of a diminutive as in kelakai, *small village* (*from* kelai, *village*); tebergai, *small axe* (*from* teber, *axe*); and ṭīṭakai, *little man of short stature* (*from* ṭīṭ, *of low stature*). In ghoṯskai, *a bullock*, the termination seems to have now no more diminutive force than the *-ock* in the English word; and the **-gai** of shahzodgai, *princess* (*from* shahzoda, *prince*), has perhaps a feminine, rather than a diminutive, meaning. In khélagai, *blockhead*, the termination probably expresses contempt rather than small size. The termination **-īṛai** also has a diminutive sense, *e.g.*, chirg, *cock*, chargīṛai, *chicken*; kok, *scone*, kokīṛai, *small scone*.

The terminations **-tia** or **-tiā** and **-töb** mark abstract nouns denoting conditions or qualities as bédortia, *wakefulness*, narīntöb, *courage*.

The termination **-sht** denotes either a verbal noun, as aryêsht, *wrangling*, a state or condition, as ṯsarbasht, *high spirit*, lit. *being fat*, or an abstract entity as molīmesht, *knowledge*. The termination **-īn** denotes a verbal noun only, as taṛīn, *arrangement*, lit. *tying*, and prékṛīn, *separation*, lit. *cutting*, also landṛīn, *making short*. Other verbal terminations are **-ana, -anna** and **-enna** as in ṯsorana, *stalking*, from ṯsorel, *to stalk*, pashtanna, *asking*, from pushtel, *to ask*, and sotenna, *keeping*, from sotel, *to keep*.

The termination **-wolai** corresponds to the English termination *-ness*, *e.g.*, kazhwolai, *crookedness*. The termination **-wolaṇ**, which has also an abstract meaning, is perhaps a mere variant of the same termination, *e.g.*, dréamwolaṇ, *arbitration*.

THE ADJECTIVE.

Adjectives of Quality.

The adjective of quality agrees with the substantive it qualifies in gender, number and case, and has consequently eight forms, which are distinguished by inflections.

(1) The majority of Waziri adjectives end in a consonant, and are declined like jawat, *evident*, below:—

	Masculine.		Feminine.	
	Singular.	*Plural.*	*Singular.*	*Plural.*
Nominative .	jawat,	jawat,	jawata,	jawaté.
Oblique . .	jawat,	jawaté,	jawaté,	jawaté.

(c) ketabton.com: The Digital Library

In some cases an **-a** may be added in the Oblique Singular Masculine and is added in the Nominative Plural Masculine, as in yīm, *raw* :—

yīm,	yīma,	yīma,	yīmé.
yīm *or* yīma,	yīmé,	yīmé,	yīmé.

In a number of consonantal adjectives the final consonant is doubled before addition of a vocalic inflection; this is especially the case with monosyllabic adjectives. Thus ḍak, *full*, cheg, *high*, ghwuṭ, *fat*, and chīkhṛan, *bleared*, make the feminine singulars, ḍakka, chegga, ghwuṭṭa and chīkhṛenna, respectively. As in the last example, the doubling of the consonant is sometimes accompanied, in other than monosyllabic words, by a modification of the vowel which precedes it.

(2) The next commonest adjectival termination is **-ai,** of which gwushai, *separate*, and āstewai, *single*, below may be taken as examples :—

gwushai,	gwushī,	gwushyé,	gwushyé.
gwushī,	gwushyé,	gwushyé,	gwushyé.
āstewai,	āstewī,	āstewyé,	āstewyé.
āstewī,	āstewyé,	āstewyé,	āstewyé.

In some cases, however, while the masculine is regular, the feminine ends in **-ai** and is invariable, *e.g.*, léwanai, *mad* :—

léwanai,	léwanī,	léwanai,	léwanai.
léwanī,	léwanyé *or* léwanai,	léwanai,	léwanai.

Geṛdai, *round*, kaṛai *or* kakaṛai, *live-long*, kortanai, *down-country*, khandanai, *bad*, mèṛanai, *good*, narai, *thin*, portanai, *up-country*, pradai, *belonging to another*, shai, *right*, tartaṛai, *stammering*, wartai, *roasted*, zèṛakai, *yellowish*, and zhwandai, *living*, belong to this exceptional class, but wartai has also a feminine singular warta.

In a few instances the feminine may be obtained by adding **-yé** to the masculine form : such is mèranai, *related through one's mother*, which makes the feminine mèranaiyé or mèranai.

All participles of verbs ending in **-ai** are treated as adjectives and belong to the first, or regular, class, *e.g.*—

Sarkhéyīnai, *head-shaving* ; sarkhéyīnyé choṛe, *razor*.

Ghwushtai (*masc.*) *wanted* ; ghwushtyé (*fem.*)

(3) Adjectives in **-a,** of which there are a considerable number, are generally declined as follows like tèra, *sharp* :—

tèra,	tèra,	tèra,	tèré.
tèra,	tèré,	tèré,	tèré.

Sometimes, however, they are treated as invariable, *e.g.*, paṉṛa, *irrigated*, de paṉṛa ghanamé paṭai, *a field of irrigated wheat*.

(c) ketabton.com: The Digital Library

(4) She, *good*, may be taken as an example of the declension of adjectives in -e: it is declined thus:—

she,	she,	sha,	shé.
she,	shé,	shé,	shé.

Sode, *simple*, and tyāre, *dark*, are perhaps the only other adjectives of this class.

(5) Adjectives in -é are either invariable like wīshé, *quiescent*, and wulé, *melted*, or are declined like the adjectives, pé, *understanding*, shwé, *slippery*, and té, *spilt*, of uncertain form, examples of the use of which will be found in the Vocabulary.

(6) Adjectives in -ī mostly follow the declension of wukī, *uncultivated*, below:—

wukī,	wukī,	wukī,	wukī.
wukī,	wuké,	wukī,	wuké.

Most of these adjectives are of foreign derivation. The adjective warböi, (*land*) *situated near the village*, makes its feminine warboya, and sahī, *correct*, makes sahīya.

(7) Adjectives in -o are rare and appear to be invariable.

The adjective péjau, *wiped*, has for feminine péjawa, péjawé.

It may be noted here that considerable uncertainty and variety of usage prevail in the declension of the Waziri adjective, and that it is rarely used in the oblique case of the plural of either gender.

Irregular Adjectives of Quality.

The following adjectives of quality are irregular:—

rough,	dīzh,	dzhe,	dezha,	dezhé.
	dzhe,	dzhé,	dezhé,	dezhé.

old,	zoṛ,	zoṛa,	zaṛa,	zaṛé.
	zoṛa,	zaṛé,	zaṛa,	zaṛé.

Comparison.

Adjectives of quality have no special forms, as in English, to denote the comparative and superlative degrees ; positive, comparative and superlative are all of one form, but the two latter degrees are marked by the insertion of words meaning, respectively, "than" and "than all." Thus she, *good,* makes pa ... na she, *better than,* lit., "*good than* ....." and pa ghuṇḍ na she, *best,* lit., "*good than all.*"

Numeral, Quantitative and Distributive Adjectives.

The principal adjectives of this class are the numerals, cardinal and ordinal.

(c) ketabton.com: The Digital Library

The cardinal numerals are :—

1. yo (*masc.*), yawa (*fem.*)
2. dwa (*masc.*), dwé (*fem.*)
3. dré.
4. tsalör, tsalwör, *or* tsalwèr.
5. pīnze.
6. shpézh.
7. owa.
8. wota *or* otaṇ.
9. na *or* tèr pa wota.
10. las.
11. ywélas *or* ywolas.
12. dwélas *or* dwolas.
13. dyārlas.
14. tswèrlas.
15. pīnzalas.
16. shporas.
17. owalas.
18. wotalas.
19. nīnas.
20. shel.
21. yowīsht.
22. dwéwīsht.
23. derwīsht.
24. tsalèrwīsht.
25. pīnzawīsht.
26. shpazhwīsht.
27. owawīsht.
28. wotawīsht.
29. nawīsht *or* yo kam dèrsh.
30. dèrsh.
31. yo dèrsh *or* yo bondi dèrsh.
32. dwadèrsh *or* dwa bondi dèrsh.
33. drédèrsh *or* dré bondi dèrsh, etc.
40. tsalwésht, etc.
50. pendzōs, etc.
60. shpéta, etc.
70. aviā *or* shpétalas, etc.
80. ātiā, etc.
90. ātiālas.
91. yo bondi ātiālas.
92. dwa bondi ātiālas, etc.
100. sel.
200. dwa sawa.
300. dré sawa, etc.
1000. zer.

Shel, *score*, is used in computing most largish numbers, thus:—

137, dré kam owa shela (lit. *three less than seven score*).

146, shpézh bondi owa shela (lit. *six over seven score*).

The word **lāk** is used to express a large number but does not mean 100,000 or any other exact number.

Yo, *one*, and **dwa**, *two*, are declined as follows:—

	Singular.		Plural.	
	Masc.	*Fem.*	*Masc.*	*Fem.*
Nom.	yo,	yawa,	*wanting.*	
Obl.	yawa,	yawé,		
Nom.	*wanting*		dwa	dwé.
Obl.			dwé	dwé.

Shel, *twenty*, may be treated as a masculine noun with plural in **-īna** and **sel**, a *hundred*, and **zer**, *thousand*, as masculine nouns with plurals

(c) ketabton.com: The Digital Library

in **-gīna**. Sel has also a plural, sawa, sawé. The other cardinals are indeclinable.

The ordinals are derived from the cardinals by adding the suffix **-am** for the masculine and **-ama** for the feminine, after elision of the final vowel if the cardinal ends in a vowel. Thus, pīnze, *five*, makes pīnzam, pīnzama, *fifth*; and shpézh, *six*, makes shpézham, shpézhama, *sixth*. Yo, *one*, is irregular, its ordinal being awwal, awwala, *first*; so is dré, *three*, which makes dréam(-a), *third*; also na, of which the ordinal is nem, nemma, *ninth*. Dwa, *two*, has for ordinal dwayam, dwéyam and dwawam. The ordinals are used and declined in all respects like adjectives of quality.

The principal remaining adjectives of number and quantity are **hḗts** *any*, **hḗts ... na**, *not any*, **dzené**, *several, some*, or *a few*, **lezh** or **lezhkī**, *little in quantity, few*, **tse**, *some*, which are indeclinable; **ḍēr**, *many*, **nīm**, *half*, **hama**, *every*, and **har**, *each* or *every*, which are declined like regular adjectives of quality; and **dwa-sara**, *both*, of which the component parts are separately but regularly declined.

Demonstrative Adjectives.

The principal adjectives of this class are **dai, dā** or **dagha**, *this*, **ā, agha** or **hagha**, *that*, and **kīm**, *such*. They are also pronouns and their declension will be found under the Pronoun. When used as demonstrative adjectives they agree in gender, number and case with the noun they point out.

THE PRONOUN.

Personal Pronouns.

The personal pronouns are as follow:—

First Person.

	Singular.	*Plural.*
Nom.	ze,	mīzh.
Obl.	mo *or* mi,	mīzh.

Second Person.

	Singular.	*Plural.*
Nom.	te,	tus *or* tosé.
Obl.	to *or* di,	tus *or* tosé.

(c) ketabton.com: The Digital Library

THIRD PERSON.

	MASCULINE.		FEMININE.	
	Singular.	*Plural.*	*Singular.*	*Plural.*
Nom.	agha	agha	agha	aghé.
Obl.	agha,	aghé,	aghé,	aghé,
	yagh, êgh,	yaghé, êghé	yaghé, êghé,	yaghé, êghé,
	é *or* yé,	é *or* yé,	é *or* yé,	é *or* yé.

The use of the various forms of the oblique, where more than one exist, can be best explained by means of a few examples. The forms **mo, to** and **agha, aghé** etc. are employed (1) to express the agent as, Mo yo zerk wuwīsht, *I shot a chikore*, (2) with prepositions generally as, Mo na gwushai shaṇ, *he separated from me*, (3) to denote the possessive by combination with the preposition de or é, *of*, as, De mo plor, *my father*, É to sheza, *your wife*.* The forms **mi, di** and **é** or **yé** are used (1) to denote the agent as, Zerk mi wuwīsht, *I shot a chikore*, (2) to mark the possessive as, Plor mi meṛ shaṇ, *my father died*, (3) to indicate interest in or connection with, as, Khwasha mi do, *it is pleasing to me, so far as I am concerned*. The object of the action may be expressed by either form as, Mo waiyī, *he beats me*; Di ghwoṛī bölī di, *he wants you, he is calling for you*.

There are also three invariable pronominal forms, **ro** for the 1st person, **dèr** for the 2nd, and **wèr** for the 3rd, which may be combined with adjectives to express interest or connection as, Losī rocheg shaṇ, *he immediately rose to meet me*, or *in my presence*, or *out of respect for me*, or may be used with prepositions in their ordinary senses as, Dāsé wèrta wuwyaiya, *tell him* (*or them*) *so*; Dushman robondi roghai, *an enemy came upon me* (*or us*). They may also be used instead of the personal pronouns proper in combination with the prepositions bondi, londi, pasé, pèri, sara, ta, zené and zokha, *e.g.*, Wèrta wyaiya, *tell him*.

Agha (which has also the aspirated form **hagha** and in the nominative singular masculine an abbreviated form **ā**) is the usual pronoun of the 3rd person: it is also used as a demonstrative adjective meaning *that* or *the*. The terminations of **agha,** used as a demonstrative adjective are sometimes curtailed as, W'agh saṛī ta wyaiya, *tell that man*.

Dagha, declined as below, is also used as the pronoun of the 3rd person: used as a demonstrative adjective it means *this*:—

	MASCULINE.		FEMININE.	
	Singular.	*Plural.*	*Singular.*	*Plural.*
Nom.	dagha, dagh, dā, dai *or* de.	dagha, dagh, *or* dā.	dagha, do *or* dā.	daghé, dā *or* dé.
Obl.	dagha, dagh, dā, dai, de *or* dé.	dagha, daghé *or* dé.	daghé *or* dé.	daghé *or* dé.

* The possessive case of the 1st personal pronoun, plural, is however in some Waziri dialects not "de mīzh" but "damīzh" or "émīzh", and this form has the inflections of an adjective, *e.g.*, damīzha mör, *our mother*.

(c) ketabton.com: The Digital Library

When dagha is used in a pronominal sense the contracted forms are preferred; the full form is the one principally used as a demonstrative adjective meaning *this*.

When **agha** and **dagha** occur in the same passage, agha means *the former* or *the one further from me*, dagha, *the latter* or *the one nearer me*.

In strictness, **agha** and **dagha** should perhaps be considered to be in all cases either demonstrative adjectives or demonstrative pronouns. If this view be taken there is no personal pronoun of the 3rd person at all in Waziri, except the oblique form **ɛ́** or **yɛ́**, the place of the nominative of the 3rd person being supplied by the termination of the verb.

Reflexive Pronouns.

The place of the reflexive pronoun, where it is the subject of the sentence, is taken by the adverbial phrase **pa khpula**, lit. *on his own (account)*; in the objective the reflexive pronoun is expressed by **dzon** as, pa khpula dzon yé meṛ kaṇ, *he himself killed himself*, i.e., *he committed suicide*.

Demonstrative Pronouns.

These are **agha** and **dagha**, already dealt with under the Personal Pronouns.

Interrogative Pronouns.

These are **tsök**? *who?* **kīm**? *which?* * and **tse**? *what?* The two former are singular and are declined as follows:—

Nom.	tsök?	} *Masc.* and *fem.*
Obl.	chā?	

	Masc.	*Fem.*
Nom.	kīm?	kīma?
Obl.	kīm?	kīmé?

Tse is indeclinable but generally plural. **Kīm** is used, but rarely, in the plural, with the inflections of an ordinary adjective: **tsök** has no plural.

"*Whether of two?*" "*which of two or more?*" are expressed by the compound **kīm yo**? literally, "*which one?*"

Relative Pronouns.

There are really no relative pronouns in Waziri, but the interrogative pronouns **tsök** and **kīm** followed by the demonstrative pronoun **agha** are used as substitutes, *e.g.*:—

Tsök (*or* che tsök) dāsé zhaghézhī, agha darwéghzan dai, *he who says so is a liar*, lit. *who says so? he is a liar*.

* Kīm is properly an adjective. It cannot stand alone except when used as an Indefinite Pronoun.

(c) ketabton.com: The Digital Library

Kīm (*or* che kīm) saṛai dāsé kor ko, **ā** badmāsh byélī, *a man who behaves so is called a ruffian,* lit. *which man does such a thing? he is called a ruffian.*

The nondescript particle **che** is also used as a relative pronoun, *e.g.*, Agha saṛai che loṛ, *the man who went.* Agha bandī che mo wunīwaṇ, *the prisoner whom I arrested.* **Che** is also used, instead of the demonstrative agha, in combination with the interrogative pronoun to form a relative, *e.g.*, Kīm yo shai che ze dèrta wushāyaṇ, *the thing which I show you,* lit. *which one thing that I show you.*

Indefinite Pronouns.

These are **yo**, *either, one*; **bel**, *another, the other*; **ghuṇd**, *all*; **tsök** *or* **hétsök**, *anybody*; **har yo**, **har tsök**, *each, every*; **kīm**, *any*; **tse**, *something, somewhat*; **har tse**, *everything*; **bel tsök**, *someone else*; for examples of the use of these words the reader is referred to the Vocabulary. In those of the foregoing which are compounds the component parts are separately declined; **tse** is indeclinable and plural: **yo** and **tsök** are declined like the numeral adjective and interrogative pronoun, respectively, having the same forms; **bel** and **har** are each declined as a singular, and **ghuṇd** as a plural adjective.

THE VERB.

Classification of Verbs.

The Waziri verbs may be divided into four classes **(1)** Auxiliary. **(2)** Simple. **(3)** Compound. **(4)** Substantive.

Moods and Tenses.

The following moods and tenses, except those marked with asterisks, are possessed by all Waziri verbs which are not defective :—

Moods.	Tenses.
Infinitive.	
Participle.	* Present.
Do.	Past.
Indicative.	Present.
Do.	Future.
Do.	Past Imperfect.
Do.	Past Indefinite.
Do.	Past Perfect.
Do.	Past Pluperfect.

Moods.	Tenses.
Imperative.	———
Subjunctive.	———
Conditional.	* Present.
Do.	* Past.
Potential.	Present.
Do.	Past.

The moods opposite which no tense is shown have only one tense, which is used with reference to all times. The present participle, where it exists, is rather a noun derived from the same root as the verb, than a mood of the verb. The conditional is of rare occurrence, and will be dealt with separately, as will also the potential, which is somewhat erratic in its formation. The remaining moods and tenses are in common use.

Auxiliary Verbs.

These are the equivalents of *to be* and *to become*, and they are used independently in these senses, besides being employed as auxiliaries to form tenses and voices of other verbs. The first has only the present, future and past indefinite of the indicative; the subjunctive; and the conditional: the other parts, including the infinitive, are wanting. The second is less defective.

The verb *to be* is conjugated as follows:—

Indicative: Present.

Singular.		*Plural.*	
(1) yaṇ,	(*I*) *am.*	yī,	(*we*) *are.*
(2) yé,	(*thou*) *art.*	yéstai,	(*you*) *are.*
(3) dai,	(*he*) *is.*	dī,	(*they*) *are.*
do,	(*she*) *is.*		

There is also an exceptional form, wī, of the 3rd person (singular and plural) of this tense which has the force of (1) *is, or are, habitually*, e.g., hamésh dāsé wī, *such is always the case*, (2) *may be, e.g.*, ke chèré dāsé wī, *should it ever be so.*

Indicative: Past Indefinite.

Singular.		*Plural.*	
(1) waṇ,	(*I*) *was.*	wī,	(*we*) *were.*
(2) wé,	(*thou*) *wert.*	wéstai,	(*you*) *were.*
(3) waṇ,	(*he*) *was.*	wī,	(*they*) *were* (*masc.*).
wa,	(*she*) *was.*	wé,	(*they*) *were* (*fem.*).

(c) ketabton.com: The Digital Library

The indicative future is formed from the past imperfect with the help of the particle wa: thus, Sabo wa ze worata waṇ, *I shall be there to-morrow.* The subjunctive is identical in form with the indicative present. The conditional is wai for all persons; as, Ke chèré mīzh khappa wai, *if ever we were to be vexed.*

The verb *to become* is conjugated as below:—

INFINITIVE.

Shwel, *to become.*

PARTICIPLE: PAST.

Singular.		*Plural.*	
Masc.	shewai	shewī	} *become.*
Fem.	shewyé	shewyé	

INDICATIVE: PRESENT.

Singular.		*Plural.*	
(1) shaṇ,	(*I*) *become.*	shī,	(*we*) *become.*
(2) shé,	(*thou*) *becomest.*	shai,	(*you*) *become.*
(3) shī,	(*he, she*) *becomes.*	shī,	(*they*) *become.*

INDICATIVE: FUTURE.

Singular.	*Plural.*
(1) wa shaṇ, (*I*) *shall become.*	wa shī, (*we*) *shall become.*
(2) wa shé, (*thou*) *wilt become.*	wa shai, (*you*) *will become.*
(3) wa shī, (*he, she*) *will become.*	wa shī (*they*) *will become.*

INDICATIVE: PAST IMPERFECT.

Singular.	*Plural.*
(1) shwaṇ *or* shwelaṇ (*I*) *was becoming.*	shwī *or* shwelī, (*we*) *were becoming.*
(2) shwé *or* shwelé (*thou*) *wast becoming.*	shwai *or* shwelai, (*you*) *were becoming.*
(3) shwaṇ *or* shaṇ (*masc.*) shwa (*fem.*) } (*he, she*) *was becoming.*	shwel (*masc.*) shwé *or* shwelé (*fem.*) } (*they*) *were becoming.*

INDICATIVE: PAST INDEFINITE.

Same in form as the past imperfect; or the participle wu may be prefixed as wushwa, *she became.*

(c) ketabton.com: The Digital Library

Indicative: Past Perfect.*

This tense is compounded of the past participle of the verb itself, *to become*, with the present indicative, of the verb *to be*.

(1)	shewai (*masc.*) / shewyé (*fem.*)	yaṇ, (*I*) *have become.*	shewī (*masc.*) / shewyé (*fem.*)	yī,	(*we*) *have become.*
(2)	shewai (*masc.*) / shewyé (*fem.*)	yé, (*thou*) *hast become.*	shewī (*masc.*) / shewyé (*fem.*)	yéstai,	(*you*) *have become.*
(3)	shewai (*masc.*) / shewyé (*fem.*)	dai, do, (*he, she*) *has become.*	shewī (*masc.*) / shewyé (*fem.*)	dī,	(*they*) *have become.*

Indicative: Past Pluperfect.

This tense is compounded of the past participle of the verb itself *to become*, with the past indefinite indicative, of the verb *to be*.

(1) shewai (*masc.*) / shewyé (*fem.*) waṇ, (*I*) *had become*, etc., etc.

Imperative.

(2) sha, *become thou.*	(2) shai, *become ye.*
(3) wu dā shī, *let him* or *her become.*	(3) wu dā shī, *let them become.*

Subjunctive.

Same as present indicative with wu prefixed.

(1) wushaṇ, (*I*) *may become*, etc., etc.

There is also another auxiliary verb, *to become*, existing only in the Present Indicative and the Imperative, which are as follows:—

Indicative—

Present.

Singular.	*Plural.*
(1) kézhaṇ	kézhī.
(2) kézhé	kézhai.
(3) kezhī	kézhī.

Imperative—

Singular.	*Plural.*
(2) kézha	kézhai.

The two verbs, *to become*, bear frequently in the 3rd persons singular and plural of their present tenses the meaning of *usually does, generally happens*, e.g., hara vrez wélé dāsé shī? *why does it happen so every day?* Hamésh khato kézhī, *he is perpetually making mistakes.*

* The Past Perfect Indicative of this and all other Waziri verbs is frequently used, as in French, instead of the Past Indefinite Indicative, *cf.* Parīn wa khpulé kété ta khatelai yaṇ, Hier je suis monté à ma chambre, *Yesterday I went upstairs to my room.*

(c) ketabton.com: The Digital Library

Simple Verbs.

The simple verbs are either verbs proper, as parédel, *to run*, gaṇḍel, *to sew*, or verbal roots compounded with a preposition, as kshémandel, (kshé-mandel), *to massage*, prékṛel, (pré-kṛel)* *to cut*.

The simple verbs are divided into intransitive and transitive.

Simple Intransitive Verbs.

The termination of the simple intransitive verbs is **-ēdel**, and these verbs are conjugated as darédel below :—

INFINITIVE.

darédel, *to stand*.

PARTICIPLE: PAST.

Singular.		*Plural.*	
† darédai *or* darédelai (*masc.*), darédelyé (*fem.*),	*stood.*	darédī *or* darédelī (*masc.*), darédelyé (*fem.*),	*stood.*

INDICATIVE: PRESENT.

Singular.		*Plural.*	
(1) daraṇ *or* darézhaṇ,	(*I*) *stand.*	darī *or* darézhī,	(*we*) *stand.*
(2) daré *or* darézhé,	(*thou*) *standest.*	darai *or* darézhai,	(*you*) *stand.*
(3) darī *or* darézhī,	(*he, she*) *stands.*	darī *or* darezhī,	(*they*) *stand.*

INDICATIVE: FUTURE.

(1) wa darézhaṇ,	(*I*) *shall stand.*
(2) wa darézhé,	(*thou*) *wilt stand*, etc., etc.

INDICATIVE: PAST IMPERFECT.

Singular.		*Plural.*	
(1) darédaṇ,	(*I*) *was standing.*	darédī,	(*we*) *were standing.*
(2) darédé,	(*thou*) *wert standing.*	darédai,	(*you*) *were standing.*
(3) darédaṇ (*masc.*), daréda *or* darédela (*fem.*),	(*he, she*) *was standing.*	darédel (*masc.*), darédé *or* daré-delé (*fem.*),	(*they*) *were standing.*

* Pré is possibly a contraction of pōri.

† Many intransitive verbs in *-édel* have an exceptional past participle of transitive form in *-awelai* either instead of, or in addition to, their regular past participle in *-édelai*; and a similar infinitive and imperative are not unknown. Thus "de ghuṇḍé saṛai guté blavsawelyé dī," *all the men have stumbled*, from blavsédel, *to stumble*: "de gaḍawelé zhagh," *the noise of dancing*, from gaḍédel, *to dance*: "pèri wukhwaṛawa," *cross over*, from khwaṛédel, *to cross*. See also page 27.

Indicative: Past Indefinite.

*(1)	wudarédaṇ,	(*I*) *stood.*
(2)	wudarédé,	(*thou*) *stoodest.*
(3)	wudaréd *or* wu darédaṇ (*masc.*), wudaréda *or* wudarédela, (*fem.*).	(*he*) *stood*, (*she*) *stood*, etc., etc.

Indicative: Past Perfect.

(1)	darédai *or* darédelai darédelyé	(*masc.*) (*fem.*) } yaṇ,	(*I*) *have stood.*
(2)	darédai *or* darédelai darédelyé	(*masc.*) (*fem.*) } yé,	(*thou*) *hast stood.*
(3)	darédai *or* darédelai dai darédelyé do	(*masc.*) (*fem.*) } etc., etc.	(*he*) (*she*) } *has stood.*

Indicative: Past Pluperfect.

(1)	darédai *or* darédelai darédelyé	(*masc.*) (*fem*) } waṇ,	(*I*) *had stood.*
(2)	darédai *or* darédelai darédelyé	(*masc.*) (*fem.*) } wé,	(*thou*) *hadst stood.*
(3)	darédai *or* darédelai darédelyé	(*masc.*) (*fem.*) } waṇ, wa, etc., etc.	(*he*) (*she*) } *had stood.*

Imperative.

Singular.	*Plural.*
(2) wudarézha, *stand thou.*	wudarézhai, *stand ye.*
(3) dā wudarézhī, *let him or her stand.*	dā wudarézhī, *let them stand.*

* Throughout this book the particle wu, indicating past time, is shewn as coalescing with the verb to which it is attached, and the particle wa, indicating future time, as retaining a separate existence. In the past tenses of transitive verbs, however, the particle wu is liable to be separated from its verb by the interpolation of another word thus, agha wulīd, *he saw*, but wu mi līd, *I saw*. In the above respects, the imperative particle wu is treated in the same manner as the past particle of the same form: so also the particle wu which enters into the composition of the subjunctive and sometimes (along with wa) of the future indicative.

SUBJUNCTIVE.

(1)	daraṇ *or* wudaraṇ darézhaṇ *or* wudarézhaṇ	} (*I*) *may stand.*
(2)	daré *or* wudaré darézhé *or* wudarézhé	} (*thou*) *mayest stand.*
(3)	darī *or* wudarī darézhī *or* wudarézhī	} (*he, she*) *may stand.*
	etc.,	etc.

Simple Transitive Verbs.

The simple transitive verbs have two conjugations: the infinitive termination of those of the first class is **-el**, of those of the second **-awel**. An example of the conjugation of each class is given below.

(I) INFINITIVE.

manel, *to mind.*

PARTICIPLE: PAST.

manelai	(*masc. sing.*)	} *minded.*
manelyé	(*fem. sing.*)	
manelī	(*masc. plur.*)	
manelyé	(*fem. plur.*)	

INDICATIVE: PRESENT.

Singular.		*Plural.*	
(1) manaṇ,	(*I*) *mind.*	manī,	(*we*) *mind.*
(2) mané,	(*thou*) *mindest.*	manai,	(*you*) *mind.*
(3) manī,	(*he, she*) *minds.*	manī,	(*they*) *mind.*

INDICATIVE: FUTURE.

(1) wa manaṇ,	(*I*) *shall mind.*
(2) wa mané,	(*thou*) *shall mind*, etc., etc.

INDICATIVE: PAST IMPERFECT.

* manaṇ *or* manelaṇ	(*masc. sing.*)	} (*in all persons and numbers*) *I was minding, thou wast minding, etc.*
manela	(*fem. sing.*)	
manel	(*masc. plur.*)	
manelé	(*fem. plur.*)	

* The gender and number of the verbal form are determined in this and in the following tenses of the indicative by the object, not the subject, of the sentence. See page 26. In this table to save space the object is assumed to be a noun or a pronoun of the 3rd person, but it may equally be a pronoun of the 1st or 2nd person, *e.g.*, wu ze manelaṇ, wu te manelé, *minded me, minded thee.* The verbal stem in these cases is the same and the terminations are as follow: 1st person singular -aṇ, plural -ī; 2nd person singular *-é*, plural -ai.

SUBJUNCTIVE.

(1) wulagawaṇ, *may strike.*
(2) wulagawé, *mayst strike*, etc., etc.

Rules for the Conjugation of the Simple Verb.

In the simple verbs of which the conjugation is regular, all the tenses may be formed from the infinitive; but, for reasons which will appear when the irregular simple verbs come under consideration, it is preferable to regard the infinitive, present indicative, past imperfect indicative, past participle and past indefinite indicative as "principal parts," independent of each other, and the present indicative and the past participle

* See footnote, page 23.

(c) ketabton.com: The Digital Library

as being the sources from which the remaining tenses of the verb are obtained. From the present indicative are formed :—

(i) the future indicative, by merely prefixing **wa** (or **wa wu**) in all persons;

(ii) the imperative, by substituting the termination **-a** for the termination **-é** in the 2nd person singular, and without any alteration in the 2nd person plural, the prefix **wu** being generally added as well. The imperative, 3rd persons singular and plural, is identical with the corresponding persons of the subjunctive, the particle **dā,** however, being prefixed or interpolated;

(iii) the subjunctive, by simply prefixing the particle **wu** in all persons.

From the past participle, which is itself declined as a regular adjective ending in **ai**, are formed the following tenses :—

(i) The past perfect indicative, by composition with the present indicative of the auxiliary verb *to be.*

(ii) The pluperfect indicative, by composition with the past indefinite indicative of the auxiliary verb *to be.*

It should be noted that the noun or pronoun which is the logical subject of the sentence stands in the nominative case with all parts of the intransitive verb and also with those tenses of the transitive verb which are formed from the present indicative; but it stands in the oblique case with the past imperfect indicative, past indefinite indicative and those tenses of the transitive verb which are formed from the past participle. When the subject of the sentence is in the oblique case, the verb agrees in number and gender with the object. The explanation of course is that in Pashto, in these tenses, the logical object becomes the grammatical subject, and that the past participle in consequence of its adjectival nature is placed in agreement with the grammatical subject. Thus "Agha mi wishtai dai" corresponds to the English "I have shot him," but means literally "he has been shot by me."

The rules for the formation of the Conditional and Potential moods of the Simple Verb are given separately on pages 32 to 34. They have little relation to the other parts of the verb.

Simple Verbs in -édel and -awel.

Attention should be paid to the close relation which exists between intransitive verbs ending in **-édel*** and transitive verbs of the same

*Two verbs in-édel,—nishtédel, *to wring,* and worwédel, *to hear*—have a transitive meaning.

(c) ketabton.com: The Digital Library

root ending in **-awel**: verbs belonging to the one class have generally, but not invariably, a counterpart belonging to the other.

According as the verb in **-édel** has (1) a passive, (2) an active, or (3) a subjective meaning, the corresponding verb in **-awel** will be found to possess (1) an active, (2) a causative, or (3) an objective meaning, as will appear from the following illustrations:—

(1)	joṛédel,	*to be made*:	joṛawel,	*to make.*
	lagédel,	*to be struck*:	lagawel,	*to strike.*
(2)	gerzédel,	*to go round*:	gerzawel,	*to make to go round.*
	zhaghédel,	*to speak*:	zhaghawel,	*to cause to speak.*
(3)	ḍarédel,	*to be afraid* (*oneself*):	ḍarawel,	*to frighten* (*another*).
	nāmédel,	*to be named* (*oneself*):	nāmawel,	*to name* (*another*).

As remarked in the footnote on page 21, some verbs in **-édel** have an alternative form in **-awel,** extending only to the infinitive, past participle and the tenses formed from the past participle, and this form, though transitive in form and grammatical construction, is intransitive in meaning: in a few cases such as āṛawel, *to be overturned*, and trakawel, *to sprout*, this irregular form seems to have entirely supplanted the form in **-édel.**

From some Waziri adjectives, especially such as end in a consonant, compound verbs in **-édel** and **-awel** can be formed with corresponding intransitive and transitive meanings; as the method of formation is fairly regular, those verbs have generally been omitted from the Vocabulary, their existence being in some cases indicated by an example under the adjective from which they are derived. When the adjective ends in a consonant, there is generally no modification of the stem, *e.g.*—

Adj.	*Intr. verb.*	*Trans. verb.*
khwash,	khwashédel,	khwashawel,
pleased,	*to be pleased,*	*to make pleased.*
ḍīb,	ḍibédel,	ḍībawel,
sunken,	*to sink of itself,*	*to make sink.*

but even this rule is not without its exceptions, *e.g.*—

mör̤,	maṛédel,	maṛawel,
satiated,	*to be sated,*	*to satiate.*

When the adjective is one with a vowel termination, the formation of the compound verb generally takes place as in one of the following instances:—

gwushai,	gwushédel,	gwushyawel,
separate,	*to become separate,*	*to separate.*
rīzhdai,	rīzhdai shwel	rīzhdyawel,
accustomed,	*to become accustomed,*	*to accustom.*

Irregular Simple Verbs.

Below follows a list of the chief irregular simple verbs, transitive and intransitive. Of each only the "principal parts" specified at page 25 above are given; the remaining parts and persons are formed from the principal parts and persons given in the table, according to the same rules which regulate the formation of the ordinary verb. Only a few of the irregular verbs have transitive or causative forms in **-awel**: these where they exist, are regularly conjugated, and their form is indicated in the following table:—

In the above table the present indicative is represented by the 3rd person singular; the past imperfect indicative by the 3rd person singular masculine for intransitive verbs, and by the form used with an object in the masculine singular for transitive verbs; the past participle (which is declined in all respects as an adjective ending in **-ai**, see page 26) by its nominative singular masculine; and the past indefinite indicative by the same forms as the past imperfect.‡

With regard to the past imperfect, it should be noted that the person or form which appears in this table is the only irregular one of the tense: the others, both in transitive and intransitive verbs, may be obtained from the infinitive by adding **-a** for the feminine singular, nothing for the masculine plural, and **-é** for the feminine plural, the **-el** of the infinitive being sometimes elided in the feminine forms, thus:—

Infinitive.	Past Indefinite Indicative.			
	m. s.	f. s.	m. pl.	f. pl.
to ascend, khatel,	wukhét,	wukhatela,	wukhatel,	wukhatelé.

to find, mīndel,	wu..mīnd,	wu..mīnda,	wu..mīndel,	wu..mīndé.

* There is also a form owrātel.

† Similarly compounds of wṛel as rovṛel, etc., except that they wants the extra forms yosī and yaweṛ. Some irregular or contracted forms occur in these compounds, as dèr'eṛ or dèreṛ for dèrweṛ, (*he, etc.*) *took* (*to you*).

‡ In the case of the verb ghawel, feminine forms necessarily replace masculine forms.

(c) ketabton.com: The Digital Library

Infinitive.

The infinitive may be used as a verbal noun; and as such it is considered to be masculine and plural, and forms its oblique case either by the addition of **-é** or by the substitution of **-é** for **-el**. The following are instances of the use of the infinitive as a noun. Boīda dī de ājizoné ghaur kṛel, *it is right to give thought to the helpless*; sharop tshel de mīzh de Musulmoné pa hakk kshé she na dī, *it is not well for us Muhammadans to drink wine.* Dā ṭīpak she wīshtel ko, *that rifle makes good shooting.* As in the case of a noun,* a preposition may be followed either by the oblique or by the nominative case of the infinitive, *e.g.*, De tre de līdelé *or* līdel *or* līdé, depora ze tlelai waṇ, *I had gone to see my uncle*; Drīmaṇ, pa tlel kshé yaṇ, *I am starting, I am in* (*the act of*) *going.*

Past Participle.

It should be noted that, besides the ordinary form, the past participle has in the nominative masculine, singular and plural, certain alternative forms; *e.g.*, in mīndel, *to find*, the ordinary masculine singular nominative of the past participle is mīndai or mīndelai, while the alternative forms are mīnda and mīndaṇ. Instances of the use of these forms are: Dolé héts shai mīnda na shī, *nothing can be found here*; Weryez do, na shī watan līdaṇ, *it is cloudy, the landscape is not visible.* The alternative form of the plural is identical in appearance with the infinitive, *e.g.*, Jang kshé saṛī wīshtel shī, *men are shot in battle.* In the singular some verbs have also an alternative form which appears to be derived from the past indefinite indicative rather than from the infinitive, *e.g.*, Tsök dāsé ko, agha woya shī, (*the man*) *who behaves in such a way gets beaten.*

Conditional.

The only common conditional is an invariable verbal form **wai**, belonging to the verb *to be*, which is used with all persons and numbers, both independently as a present or future tense, and along with participles to form a compound past tense. Examples of its use follow:—

Ke paman na wai, nör wa é dzon na garawaṇ, *if it were not mangy it would not scratch itself.*

Ke agha rasédelai na wai, mīzh wa wolata wèrta potī shewī wī, *if he had not arrived we should have waited there for him.*

It will be observed from these specimens that the present or future conditional is followed by the past imperfect indicative and the past conditional by the past pluperfect indicative.

A less frequent form of the conditional is obtained by substituting **-ai** for the ordinary termination as, Ze che Bannī ta na tlai, *if I were not*

* See page 40.

(c) ketabton.com: The Digital Library

to go to Bannu ; To ke dāsé khabara di na wéyelai, *supposing you did not say such a thing.*

The conditional is not, however, in common use and its place is frequently supplied by the subjunctive with or without such words as chèré, *ever,* etc., and of this many examples will be found in the Vocabulary similar to the following :—

Ke chèré ze worata dèrshaṇ byā wa te tse wuké ? *If I were to visit you there what would you do ?* lit. *If ever I visit you there, what will you do ?*

Potential.

The potential like the conditional has only two tenses, a present and a past. The present potential is expressed by a combination of the past participle with the present tenses of the verb *to become* (shwel), as :—

Ze tlelai shaṇ, *I can go.* Te é wāhelai shé? *Can you beat him ?* Saṛai sheza wāhelai shī, *the man can beat the woman.* Sheza saṛai wāhelai shī, *the woman can beat the man.* Agha mīzh wāhelai shī, *he can beat us.* Mīzh agha wāhelai shī, *we can beat him.*

These examples sufficiently illustrate the three rules for the formation of the present potential, 1st that the past participle is used invariably in the masculine nominative singular, 2nd that the verb shwel agrees with the subject of the sentence in person and number, 3rd that the subject precedes the object in the sentence.

The following are examples of the past potential which is formed from the past participle and the past tenses of the verb shwel. It will be seen that in this tense also the form of the past participle is invariable and that in the case of intransitive verbs the verb shwel agrees with the subject of the sentence; in the case of transitive verbs however it * generally agrees with the object of the sentence : compare page 26 :—

Parīn ze tlelai shwelaṇ (*or* shwaṇ), nen ze na shaṇ tlelai, *I was able to go yesterday, to-day I cannot go.* Paros-sazh mi agha saṛai meṛawelai shaṇ, sazh pa Gīmbatai kshé dai, sazh ze na é shaṇ meṛawelai, *last year I could kill that man, this year he is at Gumatti, this year I cannot kill him.* Pakhwo mī ḍèra maṛai khwaṛelai shwa, ös bīmor yaṇ, ös yé na shaṇ khwaṛelai, *formerly I could eat a great deal of food, now I am ill and cannot.* Wakhtī pa Mahsīd pasé mīzh ḍèré chīghé kṛelai shwé, ös yé ṭīpak ḍèr dī, mīzh chigha na shī pasé kṛelai, *long ago we were often able to pursue the Mahsuds, now they have many rifles and we cannot pursue them.*

* There are exceptions, such as the following, which seem impossible to explain : Kissé mi na shwai kṛai, *I could not utter words.*

(c) ketabton.com: The Digital Library

The potential, except in the * present tense, is not much used, and recourse is freely had to circumlocutory phrases containing words such as "power" etc., as :—

Wast mi nishta che to sara barobarī kaṇ, *I have not the power to*, i.e., *cannot, enter into competition with you.*

Passive Voice.

The foregoing remarks relate to the active voice; the formation of the passive from the active is a matter of no difficulty as it has but two main tenses, a present indicative formed by combining the past participle with the present indicative of the verb *to become* and a past indefinite indicative similarly compounded from the past participle and the past indefinite indicative of the verb *to become*. From the present indicative passive a future indicative and a subjunctive passive can be formed in the same manner as those tenses are formed in the active voice by means of the particles **wa** (**wu**), and **wu**; similarly a past perfect and pluperfect indicative according to the ordinary rules.

INDICATIVE : PRESENT.

	Singular.		*Plural.*	
(1)	wāhelai (*masc.*) / wāhelyè (*fem.*)	shaṇ, (*I*) *am struck.*	wāhelī (*masc.*) / wāhelyé (*fem.*)	shī, *we are struck.*
(2)	Do.	shé, (*thou*) *art struck.*	do.	shai, *you are struck.*
(3)	Do.	shī, (*he, she*) *is struck.*	do.	shī, *they are struck.*

INDICATIVE : FUTURE.

(Te)wa wāhelai shé, (*thou*) *shalt be struck, etc.*

It will be noticed that this tense is identical in form with the present potential, and is liable to be mistaken for it.

INDICATIVE : PAST INDEFINITE.

	Singular.		*Plural.*	
(1)	wāhelai (*masc.*) / wāhelyé (*fem.*)	shwaṇ, (*I*) *was struck.*	wāhelī (*masc.*) / wāhelyé (*fem.*)	shwī, (*we*) *were struck.*
	Do.	shwé, *thou wert struck.*	Do.	shwai, (*you*) *were struck.*
	Do.	shwaṇ *or* shaṇ (*masc.*), shwa (*fem.*) (*he, she*) *was struck.*	Do.	shwel (*masc.*) / shwé (*fem.*) (*they*) *were struck.*

* As will be seen below, even the present tense of the potential is not free from disadvantage, being to some extent ambiguous.

(c) ketabton.com: The Digital Library

INDICATIVE: PAST PERFECT AND PLUPERFECT.

(Ze) wāhelai shewai yaṇ, (*I*) *have been struck*; Sheza wāhelyé shewvé wa, *the woman had been struck, etc.*

Compound Verbs.

The compound verbs may be divided into intransitive and transitive, and each of these classes again into nominal (formed from nouns) and adjectival (formed from adjectives).

The following selected examples will indicate sufficiently how such verbs are conjugated: it is unnecessary to give at length the rules for the formation of each tense.

Intransitive Nominal Compound Verbs.

From khars, *sale.*

INFINITIVE.

kharsédel, *to sell, be sold, be for sale.*

PAST PARTICIPLE.

khars shewai (*m. s.*), kharsa shewyé (*f. s.*) } *sold.*

kharsa shewyé wa (*f. s.*) }

IMPERATIVE.

kharsézha *or* khars sha, etc., *be thou sold, etc.*

SUBJUNCTIVE.

wukharsézhī, etc., *it may sell, etc.*

Intransitive Adjectival Compound Verbs.

(*a*) bīra shwel, *to be delivered of a dead child or young one.* In this form, with shwel, the adjective preserves its separate

* The second form has generally a frequentative meaning, *is usually sold.*

existence, and is inflected exactly as an adjective combined with the verb *to become*.

(*b*) *from* cheg, *high, raised.*

INFINITIVE.

chegédel, *to rise up.*

PAST PARTICIPLE.

cheg shewai (*m. s.*)
chegga * shewyé (*f. s.*) } *risen up.*
etc.

INDICATIVE.

chegézhaṇ, etc., (*I*) *am rising up, etc.*
wa cheg shé, etc., (*thou*) *shalt rise up, etc.*
chegéda, etc., (*she*) *was rising up, used to rise up, etc.*
cheg shaṇ, etc., (*he*) *rose up, etc.*
cheg shewai dai, etc., (*he*) *has risen up, etc.*
cheg shewī wī (*m. pl.*), etc., (*they*) *had risen up, etc.*

IMPERATIVE.

chegézhai *or* cheg shai, etc., *rise* (*ye*) *up, etc.*

SUBJUNCTIVE.

wuchegézhaṇ, etc., (*I*) *may rise up, etc.*

Transitive Nominal Compound Verbs.

From ḍazz, *a shot.*

INFINITIVE.

ḍazzawel, *to fire at.*

PAST PARTICIPLE.

ḍazzawelai (*m. s.*), *fired at.*

INDICATIVE.

ḍazzawé, etc., (*thou*) *firest at, etc.*
wu ḍazzawī, etc., (*he*) *will fire at, etc.*
(sheza mi) ḍazzawela, etc., (*I*) *was firing* (*at the female*), *etc.*
(saṛī yé) wuḍazzawel, etc., *he fired at* (*the men*), *etc.*
ḍazzawelai (mi) dai, etc., (*I*) *have fired at* (*him*), *etc.*
(sheza di) ḍazzawelyé wa, etc., (*thou*) *hadst fired at* (*a female*).

IMPERATIVE.

wu (yé) ḍazzawa, *fire at* (*him*).

* See page 10.

(c) ketabton.com: The Digital Library

SUBJUNCTIVE.

wu (yé) ḍazzawaṇ (ke na?) etc., *may I fire at (him or not?), etc.*

Transitive Adjectival Compound Verbs.

From gaḍ, *mixed.*

INFINITIVE.

gaḍawel, *to mix.*

PAST PARTICIPLE.

gaḍ keṛai (*m. s.*), *mixed.*

INDICATIVE.

(dā mīzh) gaḍawī, etc., (*we*) *are mixing* (*it*), *etc.*
(ze) wa (é) gaḍawaṇ, etc., (*I*) *shall mix* (*it*), *etc.*
(ébö mi sara) gaḍawelé, etc., (*I*) *was mixing* (*water with it*), *etc.*
(pai yé sara) gaḍ kṛel, etc., (*he*) *mixed* (*milk with it*), *etc.*
(pai yé sara) gaḍ keṛī dī, etc., (*he*) *has mixed* (*milk with it*), *etc.*
(ébö mi sara) gaḍḍé keṛyé wé, etc., (*I*) *had mixed* (*water with it*), *etc.*

IMPERATIVE.

gaḍawa *or* gaḍ (*m. s.*) ka, etc., *mix thou, etc.*

SUBJUNCTIVE.

(ze) wu (yé) gaḍawaṇ, etc., *may I mix* (*it*), *etc.*

The passive of the transitive nominal compound verb is formed in the same way as that of the transitive simple verb, *e.g.*, Parīn ze wu ḍazzawelai shwaṇ, *I was fired at yesterday,* but there is no proper passive of the transitive adjectival compound verb and its place is taken by the adjective from which the verb is derived combined with the verb *to become, e.g.*, ébé sara pai gaḍ shwel, *milk was mixed with the water.*

Substantive Verbs.

These are two only:—

shta,	*there is,*	*or,*	*there are.*
nishta,	*there is not,*	*or,*	*there are not.*

Zamen di shta ke nishta, *are there sons of yours or not?* i.e., *have you sons or not?*

Particles ro, dèr and wèr.

The pronominal particles **ro, dèr** and **wèr** are used with verbs to indicate whether the person interested in, or affected by, the action of the verb is the 1st, 2nd or 3rd respectively.* Their combinations with tlel and

* Compare page 15.

(c) ketabton.com: The Digital Library

kṛel or kawel are of special importance, and may be studied in the Vocabulary. Other examples of their use are :—

Rocheg shaṇ, *he rose for me*, i.e., *to meet me, or, out of respect for me ;*
De paṭakī na ébö dèrwubosa, *take water for yourself out of the flask ;*
Plor ta wa wèrdrīmaṇ, *I will go to him, namely, to my father.*

Impersonal Verbs.

A principle of general application is that verbs used in an impersonal sense must invariably be treated as of the 3rd person plural,* and not as of the 3rd person singular, as in English : this rule derives special importance from the fact that verbs of transitive form used with an intransitive meaning and transitive verbs used without an object † are considered to be impersonal in those tenses which require the logical subject to be in the oblique case.‡ Examples of impersonal verbs are :—

Boīda dī che ... *it is right and proper that* ... lit. *they are right and proper that ...*
Wu mi zhaṛel, *by me it was wept*, lit. *by me they were wept*, i.e., *I wept.*
Mīzh worwédelī dī che ... *by us it has been heard that*, ... lit. *by us they have been heard that*, ... i.e., *we have heard that.*

THE ADVERB.

The adverb calls for no remark : it is invariable in form and its comparison is conducted on the same principles as that of the adjective.

An exception to the rule of invariability is the word ḍèr, when used in the sense of *very* ; in this case it is inflected like an adjective in sympathy with the adjective which it qualifies, thus :—

Ḍèr khwor saṛai, *a very poor man.*
Ḍèra khwora sheza, *a very poor woman.*

The same holds of adjectives used as adverbs to qualify other adjectives, for example, Reṭṭé sāṛé ébö, *intensely cold water.*

Adjectives, as in English, are occasionally used adverbially ; and in such cases they are inflected as adjectives to agree with the substantives or pronouns to which they refer, *e.g.* :—

Jilkai ṭinga wudaréda, *the girl stood firmly*, lit. *firm.*

---

* There is, however, a common impersonal construction for ordinary verbs with the feminine singular, *e.g.* Dāsé do, *it is so* ; Mo wupushta, *I inquired.* In this case there is probably a word, perhaps khabara, understood ; if so, the above phrases stand for Dāsé khabara do, and Hagha khabara mo wupushta.

† Occasionally even when used with an object, as Plor yé wèr manḍa kṛel, *his father ran towards him* ; Amonat di wélé khanatawel ? *why did you misappropriate the deposit ?* This is a curious development.

‡ The reason no doubt being that the grammatical subject (see page 26) is an abstraction and therefore impersonal.

(c) ketabton.com: The Digital Library

The prepositions de and é are frequently prefixed to adverbs of place without altering their meaning, as wörchané or é wörchané, *outside*.

THE PREPOSITION.

The simple prepositions are few in number: they are:—

* **bé**, **bé**...**na**, **bé de**...**na**, or **bé la** . . . **na**, without, devoid of, except.
bondi or **pa**...**bondi**, above, upon.
† **de** or **é**, of.
de...**depora**, for.
kara or **de**...**kara**, in the house of.
kshé or **pa**...**kshé** in, into.
londi, **de**...**londi**, or **pa**...**londi**, under.
pa, on, upon.
pa...**na**, than.
pasé, **de**...**pasé**, or **pa**...**pasé**, behind, after.
pèri, **pöri** or **de**...**pèri**, **dé**...**pöri**, across.
na, **de**...**na**, **la**...**na** or **tar**...**na**, from, with relation to.
sara, **de**...**sara**, or **pa**...**sara**, with.
ta or **wa**...**ta**, to.
zokha, with, in possession of.

The single prepositions **bé**, **de**, **é** and **pa** precede the word they govern: **bondi**, **kara**, **kshé**, **londi**, **pasé**, **pèri** or **pöri**, **na**, **sara**, **ta** and **zokha** follow it: while the remainder, consisting of two parts each, enclose it, *e.g.*—

de saṛī *of the man.*
saṛī na, *from the man.*
wa saṛī ta, *to the man.*

A number of compound or secondary prepositions are formed by combination of adverbs with the simple prepositions **de** *or* **é** and **na**. Such are . . . na awwal, *before*; de . . . makhamakh, *in front of*; etc., etc. These compound prepositions are distinguishable from prepositions proper chiefly by their incapacity to combine with the particles ro, dèr and wèr (see page 15). Thus, Pa mo pasé and Ropasé, *behind me*,

* Frequently compounded with the word it governs as, Bé-adaba, *without politeness, impolite.*

† There is also a form de . . . na, or é . . . na, *e.g.* Dā bogh de to na dai ke de chā na dai? *is that garden yours, or whose is it?* Dā wos é mo na dai, *that horse is mine.* In this form only the intonation distinguishes the particle na from the negative particle of the same form. Occasionally the preposition de or é is suppressed altogether, as Juworé lauīna, *the harvesting of the maize*, and in some of these cases there is an approximation to the English compound word, as in mezzī ṭīpak, *match-lock.* The omission of the preposition may also occur with pronouns, *e.g.*, mo dai, *it is mine.*

(c) ketabton.com: The Digital Library

both exist, but Pa mo na vṛondi, *before me*, has no such counterpart as "Rovṛondi."

The preposition may be used with either the nominative or the oblique case of the substantive to which it is attached. The preposition **pa** appears to be more frequently followed by a nominative than by an oblique; but with most of the other prepositions the oblique is preferred. The personal pronouns invariably stand in the oblique when accompanied by a preposition; from this and from the analogy of Peshawar Pashto it may be inferred that the use of the nominative with prepositions is a colloquialism which in Waziri has partially superseded the proper grammatical construction.

It may be noted that in Waziri **pa ɛ́**, *on him, her, etc.*, is contracted to **pɛ́**, and that **pa** alone is sometimes used instead of **pɛ́**.

The word **zenɛ́** (see Vocabulary) is an adverb rather than a preposition, though it is capable of being used in certain prepositional constructions.

THE CONJUNCTION AND THE INTERJECTION.

Both of these are invariable in form and are used as in English. Some of the principal interjections are:—

(1) those of assent, **ɛ́** *or* **hɛ́**, *yes!* **allā**, *indeed!* **ɛ́ rāhmāta**, *exactly so!*

(2) those of negation, **na**, *no!* or, more politely, **na rawo**, *excuse me!*

(3) those of wonder or admiration, **ballɛ́** (generally reduplicated **ballɛ́ ballɛ́**), *extraordinary!* **bechɛ́** (generally reduplicated **bechɛ́ bechɛ́**), *remarkable!*

(4) those of approval, **kshelai**, *good!* **shābāsh** *or* **shobashɛ́**, *bravo!*

(5) those of sorrow, annoyance, weariness, etc., **hai hai**, *alas! what a pity! heigho!*

(6) those of disapproval, **ɛ́ toba**, *fie! for shame!*

(7) those without a definite meaning, the function of which is to attract attention or introduce other words, **ɛ́** or **hɛ́**, *oh! ho!* **yarra**, *I say.*

There are also various words used in driving or frightening animals, or in ordering them to stand still, which are of the nature of interjections and will be found in the vocabulary; such are **ash, bo, harra, höā, kattɛ́, kwurrɛ́, shoɛ́.**

* The following is an index, not a vocabulary, and the words to which reference is given should be turned up in the Waziri Vocabulary. Used as a dictionary the index will be found misleading. When a word required is not found in the index, other closely related words from the same root should be examined; if they afford no assistance, a synonym should be tried. Abstract and scientific words will usually be sought in vain, the ideas which they represent being foreign to the Waziri language.

APPENDIX I.

Parable of the Prodigal Son done into Waziri Pashto with interlinear literal English translation.

De yawa saṛī dwa zāmen wī. Kam zéī yé wa plor ta wuwé,
Of one man two sons were. Younger son his to father [to] said,

che, "Ē plora, mo ta agha bakhra roka, che pa dagh mol
that, "Oh father, me to that share give, which in this property

kshé mi do." Agha khpul che tse dunyo wa, agha yé wèrta
[in] mine is." He own that what wealth was, that he to-them

wuwéshela. Ḍèré wrezé na wé tèré shewyé, che kam zéī yé
divided. Many days not were past become, when younger son his

ghunḍ mol roghunḍ kaṇ, au uriyā watan ta rawon shaṇ,
all property collected made, and distant country to departing became,

au wolata khpula dunyo pa badkorī kshé yé kharopa kṛa. Au
and there own wealth in evil-doing [in] he spoilt made. And

che ghunḍ khpul mol yé werk kaṇ, nör, pa watan ḍèra khworī
when all own property he lost made, well, on country great scarcity

koghla, au agha pa khpula ḍèr tang shaṇ, au de hagha watan
came, and he himself very distressed became, and of that country

wa yawa saṛī ta loṛ, wèrgaḍ shaṇ. Yagh saṛī wa khpula mzeka ta
to a man [to] went, joined became. That man to own land [to]

wulözhaṇ, che, "Dā ṭīṭsarī wupyaiya," au dai pa dā bondi rozī waṇ
sent, saying, "These swine pasture," and he on that [on] satisfied was

che khpula geḍḍa de pergai pa kwuṭélīkhé bondi maṛa kṛai,
that own belly of acorns on husks [on] satiated should make,

che de ṭīṭsarai khwarok waṇ; wélé chā tse wèr na kṛel. Byā
which of swine food was; but anybody anything him not gave. Then

dai, kīm wakht che pa yīsh shaṇ, nör, é wuwéyel, che, "De mo de
he, what time that in senses became, well, he said, that, "Of me of

plor de kör tsémra mazdīron maṛai khwurī, au zené
father of house how-many hired-servants food eat, and from them

potyé kézhī, au ze de lwazhé mraṇ. Ze wa cheg shaṇ, khpul
over remains, and I of hunger die. I will risen become, own

plor ta wa wèrdrīmaṇ, wèrta wyaiyaṇ wa, che, "Ê plora, de
father to will go, to him say will, that, "Oh father, of

Khudai hāṇ gunagor yāṇ, au de to hāṇ gunagor yāṇ, au ze dāsé
God also sinner am, and of thee also sinner am, and I thus

kabīlé na yaṇ che de to zyai rota wuwyaiyī. Pa
worthy not am that of thee son to me they should-say. Among

khpulé nīkaroné kshé mi dèrsara nīkar ka, che pa rīpai nīkaron
own servants (among) me with-thee servant make, that on pay servants

dī." Nör agha cheg shaṇ, wa plor ta roghai; wélé agha lyā
are." Well he risen became, to father [to] came; but he still

de plor na liré waṇ che plor wulīdaṇ, au zṛe yé
from father [from] far was when father saw, and heart his

pé wusiö. Plor yé wèr manḍa kṛel, pa ghyêzh kshé
upon-him burned. Father his to-him running made, in bosom [in]

wunīwaṇ, au kshal yé kaṇ. Zéī yé wèrta wuwé, che "Ê plora,
took, and kissed him made. Son his to him said, that "Oh father,

ze de Khudai gunagor yaṇ, au de to pa nazīr kshé hāṇ gunagor
I of God sinner am, and of thee in sight [in] also sinner

yaṇ, au ze dagha sara na joṛézhaṇ ché tsök de to zyai rota
am, and I this with not am-fit that anyone of thee son to me

wuwyaiyī." Wélé byā plor yé wa khpulé nīkaroné ta wuwé,
should-say." But then father his to own servants [to] said,

APPENDIX III.

Some Leading Waziri Characteristics.

This essay on Waziri characteristics refers primarily to the Waziris of Tochi, but much of it applies without qualification to the other inhabitants of Waziristan, including the Mahsuds. While however the Mahsud is, so to speak, more of a Waziri than the Waziri proper, the Dauri of Tochi is considerably less of one, and a few separate remarks have accordingly been added on the subject of the Dauris. The Waziris of Bannu are rapidly ceasing to be Waziris: ease and plenty have converted some of them into respectable and law-abiding subjects, while contact with Bannuchi civilisation and the neighbourhood of a demoralising city have, it is to be feared, sapped at the same time the best qualities of nearly all. The Waziris of Kurram, especially the Kabul Khels, in many points resemble their northern neighbours the Zaimushts, Afridis and others rather than the various branches of their own tribe, and they with the Waziris of Bannu must be understood to be excluded from the scope of the following remarks.

The present character of the Waziris must not be regarded as fixed. It is in part the product of circumstances and surroundings which, with the British occupation of part of Waziristan, have already begun to undergo transformation. The actual state of Waziri civilisation is remarkably backward, extraordinarily so indeed when the proximity of the tribe to the Derajat and their old established intercourse with that region are considered. Muhammadanism, too, has done less for them than for most of its votaries, and probably the most unsparing critics and savage detractors of the Waziri will be found among his co-religionists. The Waziri name is execrated, as no other is elsewhere, by neighbouring Muhammadan tribes; and Muhammadans from a settled district often regard Waziris as utter barbarians and seem inclined to deny their title to be considered as belonging to the faith. A travelled Khostwal, who had visited Mecca and was robbed by Waziris on his way home within a few miles of the Khost border, gave it as his opinion that the robbers of the Hedjaz were gentlemen in comparison with those of Waziristan. A learned Syrian of Damascus, whom hard fate had brought to the Tochi, was heard to compare them in one breath to dogs, lions, fleas and several other objectionable animals. This Syrian had the further misfortune to be associated with the well-known Kippat Khan, in deciding a jirga case, and was by no means favourably impressed with the leading Malik of

(c) ketabton.com: The Digital Library

the Mohmit Khels, who evidently figured in his imagination less as a human being than as a ghoul or monster out of the Arabian Nights "He has," exclaimed the Haji in Arabic, "the lips of a camel, the brain of an elephant and teeth like bits of stone;" and words failed him to describe the noisiness, obstinacy and utter unreasonableness of his Waziri colleague.

But although it is difficult to make any impression on the Waziri, he is not entirely proof against ameliorating influences when they can be brought to bear upon him in a concentrated form during some length of time. A Waziri who has been in Government service for a few years, especially if he has come in personal contact with British officers, is many steps removed from the ordinary tribal savage. The following incident will serve as an illustration. In the spring of 1898 a British officer went shooting from the Saidgi post with several orderlies, one or two of whom were Waziris in Government service. A Waziri shepherd, who was grazing his flock near the path along which the party passed, remarked to the orderlies in a low voice, "Why do you not shoot the European and take his rifle? I will show you a road by which you can escape." A little further on the party sat down and the shepherd, evidently thinking that his plan was about to be put in action, came and squatted down beside them. The result of his suggestion must have been surprising to himself, for hardly was he seated when a Yusufzai orderly went up to him, disarmed him of his knife, slapped his face and dragged him about on the ground by the hair of his head; when the Yusufzai finally let him go he continued, in the height of his indignation, to throw stones at the man till he was out of range. The Waziris of the officer's party joined in the laugh against the shepherd and admitted that he deserved his punishment, but they did so half-heartedly and as if conferring a favour. Here were three stages of development admirably personified: first, the primitive Waziri who sees in every stranger an opportunity for murder and robbery; second, the slightly civilised Waziri who sets his face against such practices, but has not entirely lost sympathy with them; and lastly, the Pathan, a British subject of the third or fourth generation, who is hardly more capable than an Englishman of entering into a Waziri's feelings on the subject of unprovoked and wanton crime. It is to be hoped that by this occurrence the shepherd himself was considerably enlightened, and that the sentiments of his grandchildren, should he have any, will in consequence resemble those of the Yusufzai orderly rather than those of their own progenitor. It would be unfair to the present generation of Waziris, however, not to admit that many of them are more advanced than the orderlies who rejected, though they did not resent, the shepherd's villainous suggestion, and it should be added that a few are as civilised as almost any common

Pathans, though these favourable specimens, unfortunately, occur mostly among the degenerate Waziris of Bannu.

To understand what the Waziri is to-day we must consider what his country was till lately and what it must, to a great extent, for ever remain. The correspondence between the man and his country is in the case of Waziristan too striking to be ignored and too obvious to be denied. Waziristan is in the first place poor and barren, in the second pastoral, in the third rugged and difficult of access, and in the fourth almost devoid of running water.

The poverty of the country and the effort required to gain a subsistence in it have made the Waziris a hardy and enduring race. Their physique is uncommonly good, and though on the average short of stature, extremely tall and large men are to be found amongst them. They are generally deep-chested and compact of build, with a powerful muscular development participated in by the whole body and not confined to the lower limbs as with some hill-tribes of the Himalayas. As mountaineers the Waziris would probably hold their own with any other Pathan tribe of the North-Western Frontier. The dependence of their hard physical condition upon their way of life is proved by the change which they undergo when well fed and deprived of strong exercise in the open air. Confined in jail they rapidly become stouter, younger in appearance and fairer in complexion; but when first released they are short of breath and easily tired by exertion. Handsome faces of a hard type are not uncommon among the Waziris, and if they wear their hair long this is a peculiarity to which it is possible for the stranger's eye to become accustomed. Unfortunately, however, such is the squalor of their clothes and persons, proverbial even among Pathans, that no European can find pleasure in contemplating them except at a respectful distance. While the poverty of the country has undoubtedly made the Waziri a fine human animal, it seems doubtful whether, as some authorities would persuade us, it is also responsible for his being an inveterate robber and thief. There are poor countries in the world where life and the rights of property are thoroughly respected, poverty notwithstanding; such are Norway in Europe, and in Asia, parts of the Kohat and Peshawar Districts which lie on the same frontier as Waziristan.

The effects of a pastoral life are much less open to dispute than the effects of poverty. Some of the Waziri tribes have practically no cultivable land at all; and a few of them, such as the Tọl Khels who are all either herdsmen or robbers, actually live in tents the whole year round and though they return to the same haunts season after season, have no fixed village or abode anywhere. Extremes of climate and the necessity for the flocks and herds to follow the pasture to the high uplands in summer and to the lower grazing-grounds in the cold weather have perpetuated

(c) ketabton.com: The Digital Library

nomadic habits among many sections, with consequent restlessness, improvidence and incapacity for sustained exertion. The facilities offered for commission of crime by membership of a community which frequently changes its location and sometimes has settlements simultaneously in places two or three days' journey apart are so obvious that they need only be mentioned.

It is, however, the rugged and impassable nature of the country and its geographical position, rather than its barrenness or pastoral character, which have most profoundly influenced the Waziri in his relations both with his fellow-tribesmen and with his neighbours. Except in a few of the highest hills, which are well-wooded, the country is a mass of rock and stones bearing a poor growth of grass and thinly sprinkled with dark evergreen bushes; progress in every direction, except on devious paths known to the natives, is obstructed by precipices or by toilsome stony ascents; and knowledge of the topography, a mere labyrinth of intricate ranges and valleys, comes only as the result of long acquaintance. Except in a few favoured spots and on the roads constructed by Government a horse cannot cover half a mile at a pace faster than a trot without danger of lameness.* The consequences, both bad and good, of such natural surroundings are easy to trace. Broken ground and tortuous ravines, by making crime easy and precaution against attack difficult, have fostered violence among the people and developed in them an extraordinary faculty of prudence and alertness. The inaccessibility of one place from another, together with the slenderness of even the pastoral resources, promotes dispersion of population; and communities and individuals who live isolated from one another in time, if hardly in distance, have become, in consequence of their isolation, independent, self-reliant and democratic in sentiment. Through the inaccessibility of his own country to lowlanders, combined with the proximity of open and fertile tracts inhabited by races of inferior stamina, the Waziri has developed into a confirmed raider; and the passage through his country of routes connecting Afghanistan with India has made him, by frequent opportunity, a hereditary highwayman as well. It is this contact, under geographical conditions favourable to himself, with races of deficient energy and aggressiveness that has endowed the Waziri with the insufferable swagger and blustering arrogance which principally endear him to strangers. Given the above data with their immediate consequences, it is not hard to realise why the Waziri, cut off from civilisation and progress, has remained a neglected barbarian, loathed by his neighbours and despising them.

* What, by the way, is the celebrated "Waziri" horse hardly found at all, now at least, in Waziristan? An experienced cavalry officer of the Frontier Force assures the writer that no such animal ever existed, and that the so-called "Waziris" were merely the produce of Baluch mares owned in Waziristan and in the Bannu District.

(c) ketabton.com: The Digital Library

The scarcity of water in Waziristan is not without its effect upon the inhabitants, but that effect is naturally one observable in the manners rather than in the minds and morals of the people. The writer cannot remember that during a two years' sojourn in Tochi he ever surprised a Waziri washing his body, except in the formal and by no means cleansing manner, which religion dictates as a preliminary to prayer. Once only he came upon Waziris washing their clothes, and that in a pool so secluded that it almost seemed as if the men felt themselves to be transgressors against the best traditions of their country and people. In extenuation of this Waziri failing it can only be pleaded that large stretches of Waziristan are almost destitute of running water, and that the scanty springs cannot, of course, be contaminated by bathing or washing clothes; besides which, the idea of ablution is not kept present to the mind by the sight of water as it is in a country where water abounds. Perhaps the most remarkable fact in connection with the universal and absolute want of cleanliness among Waziris is that it seems to have no prejudicial effect upon their constitution; and it would be difficult to maintain in Waziristan, in argument with living proofs of the contrary, the modern European doctrine that cleanliness is a necessary condition of health. Probably no Waziris, except those who live on the banks of the Kurram, know how to swim, and certain it is that many of the tribe have never seen a collection of water large enough to drown a man, except during the floods which accompany storms in the hills and subside immediately after.

Enough has been said to show how the character of the Waziri may be in part explained by the influence of his surroundings; but it must be added that he also possesses qualities which cannot be connected in any direct way with the climate or physical conformation of Waziristan. These features of his character may be regarded either as inherent, or as having their origin in some earlier home of the race, though unlike many other frontier tribes (as we may remark in passing) the Waziris have no traditions of a home-land older than that they now inhabit. Such unaccountable qualities are the Waziri's light-heartedness and sense of humour, his hot temper and his dogged pursuit of revenge, and they are the more remarkable as being inconsistent respectively with his dull materialism, his calculating wile and his fickleness in most schemes and pursuits.

Socially the Waziri is a good companion, being easy-tempered, fond of conversation and a close observer of human character, with a quick eye for the comic element whenever it presents itself and a ready laugh. In fact the laugh is so ready that from a large party of Waziris in good temper it is never long absent, and the merest trifle is enough to excite an outburst. On one occasion a Waziri who appeared with a claim before

(c) ketabton.com: The Digital Library

the Political Officer in the Tochi, after stating that he was a Razoni by caste, gravely added in a moment of mental aberration that his father had been a Razoni too: the whole assembly were instantly convulsed with merriment at this—especially in the East—so superfluous remark, and their amusement was redoubled when the Razoni, on being questioned by the Political Officer before he had time to recover his composure, failed to recollect the name of his own grandfather and stood overwhelmed with the deepest shame and confusion. An equal perception of the lighter side of things was shown by a Mahsud lad at Jandola during the Mahsud blockade, who happened to pass the Commissioner taking an evening stroll. Instead of salaaming, and without slackening his pace or removing his musket from his shoulder, he slapped himself several times on that part of his anatomy which might be supposed to be suffering most from the scarcity of food in the hills; this was a salutation, a delicate compliment to the power of the Commissioner as head of the blockade and a pithy comment on the political situation all in one, and it was accompanied by a look of the most portentous gravity which made the performance irresistibly comic. An elderly Waziri frequently possesses a penetrating and genial humour which lends great charm to his descriptions of men and events, and it is often a treat to hear a grey-bearded reprobate rehearse, with keen enjoyment of every detail, some incident which he has witnessed, a well-arranged ambuscade or assassination for instance, or the progress of negotiations between two parties each of them trying to out-do the other in duplicity. It would be a mistake, however, to imagine that an engaging manner or a pleasant address is common among Waziris. On the contrary their manners are summary, not to say brutal, and a frequent mode among them of attracting the attention of a man who does not hear when he is first addressed is to throw a small stone at or towards him. Still Waziris are capable of a very insinuating address upon occasion, and it is sometimes difficult to treat with proper severity the old man who caresses an imaginary beard upon your chin, assuring you at the same time with plausible logic that this unpleasantness between friends is the result of a misunderstanding or the work of mischief-makers; and scarcely a less effort may be required to punish the handsome, upstanding youth who, after flinging his turban in your lap, collapses at your feet with locks almost touching the ground, skilfully admitting only part of his fault but praying for complete forgiveness. These extreme forms of self-abasement, it should be added, are reserved for great occasions; and the speed with which the performer recovers his equanimity after the exhibition, especially if his request has been granted, is almost startling.

Of the hot-headness of the Waziri, the attack on troops at Maizar in 1897 was an example on the large scale: the affair was certainly

(c) ketabton.com: The Digital Library

unpremeditated by the great majority of those who took part in it, and even the ringleaders, had they stopped to weigh the probable consequences to the Madda Khel tribe of their advertising in such a fashion their personal grievances, would hardly have ventured to commence the fray. Other instances of Waziri rashness will come under notice when we reach the subject of Waziri dances, and the writer recollects a case in point when, in December 1898, a Mahsud and a Darwesh Khel jirga fell foul of each other at Bannu City. The cause was a trifling dispute between a Mahsud boy and a Darwesh Khel Malik of no importance, yet in less than a minute from the receipt of provocation respectable Darwesh Khel headmen were rushing to and fro like lunatics hurling stones and brickbats, and a general riot was not averted without difficulty and the use of a little force. Having seen a number of frays of this kind, the writer is convinced that the Waziri, from the moment a blow is struck on either side, "sees red," loses all thought of consequences and ceases to be accountable for his actions. The following little story, extracted from the Tochi Political Diary of the 8th March 1899, will shew how insanely a Waziri can act upon sudden provocation.

"Garare, Malikshahi, owed money to Ret, Wruke Jani Khel, and some time ago Ret seized a pistol belong to Garare and kept it as a pledge for repayment of the debt. One day in the middle of February, while Ret was out, Garare visited his house and took away the pistol. Ret on learning what had happened armed himself, and went in pursuit of Garare. The Wruke *chiɣha* turned out, and so did that of the village of Alias, Tori Khel, but before they came up Ret had stabbed Garare and Garare had shot Ret with the pistol. Both died almost on the spot."

Closely connected with the hot-headedness of the Waziri, and perhaps its hidden spring, is his absurd vanity which finds contempt or ridicule impossible to bear, and resents with violence the slightest insult, or indeed any act whatever intended by the doer to place the object of it in an undignified or unfavourable light. Often hardly distinguishable from the Waziri's vanity is his "sharm" or "shame" (Quaere, false shame), a highly commendable virtue on the possession of which the Waziri, like other Pathans, prides himself; while the non-Pathan portion of the human race are unable so much as to understand in what this quality consists. Sometimes "sharm" approaches self-respect, at other times it resembles modesty, occasionally it might be identified with shyness, and now and again perhaps it means nothing more nor less than conventional etiquette. If a Pathan in a social matter behaves either better or worse than another man would have done in the same circumstances and is asked the reason, he is sure to ascribe his singularity to the "sharm" animating him, to which ordinary human clay is a stranger. Thus "sharm" forbids a Waziri to mention his father's name,

(c) ketabton.com: The Digital Library

and in this respect it goes further than the "sharm" of other Pathans who do not fail to rally him on this peculiar custom, forgetting or not aware that some of their own kinds of "sharm" are no less absurd in the eyes of the outer world. One more instance of Waziri "sharm" will suffice. The son of a Tochi Malik deserted from the Levies taking with him the horse supplied by his father for the Government service. The Political Officer suggested to the Malik that he should recover the horse at home and send a servant back with it as his nominee to fill the vacancy in the Levies. The Malik entirely concurred as to the suitableness of the arrangement, but requested that the Political Officer would formally order him to carry it out, otherwise, he said, his "sharm" would prevent him from doing so. What possible feeling was present to the man's mind, and how the word "sharm" should in this case be translated, are questions left for the reader to determine.

In the Waziri, at least, "sharm" is no bar to shameless greed, and the venality and inordinate love of money which possess almost every individual are in themselves a strong guarantee against the Waziri tribe becoming a politically uncontrollable body. A community each member of which prefers his separate interests to the general weal can never be formidable, apart even from the question of material resources, to a strong government with large powers of punishment and reward. But politics do not come within the range of this essay, and to explain the character of the Waziri no more need be said than that a poor man in many another country would refuse a considerable sum of money, which he scrupled to accept, with less reluctance than a well-to-do Waziri would experience in declining a single rupee. Aliyas, a leading Malik of the Tori Khels, since dead, was in 1899 presented with an embroidered sheepskin coat as a reward for good service to Government, and with the acquisitive faculty (as ever) on the alert, he glanced round the room for something not his own in which to carry it away. The first suitable object he spied was a cotton shawl belonging to a clerk of the Political Officer's establishment, and annexing this he packed the *postin* in it, slung it over his shoulder and proceeded to leave the room. The owner approached to remonstrate, but Aliyas only raised an elbow to jostle him in the face and continued on his way without even looking round. This was an act of grasping meanness, but regard being had to the character of the actor, it is probable that a sense of grim humour may have mingled with it.

The obstinacy and unreasonableness of the Waziri who has a point of his own to gain are among the most salient features of his character, but these qualities from their nature are difficult to exemplify by an anecdote. A Waziri jirga who have made up their minds to resist the intentions of Government or of a Government officer, are, perhaps, one of

(c) ketabton.com: The Digital Library

the most difficult bodies to move, and one of the most impracticable, in the whole range of terrestrial politics. While their ingenious heads teem with arguments in favour of their own view, to which their public men are capable of giving clear and logical expression, they feign so successfully not to perceive the force of the arguments on the other side that the officer who presents them is, if inexperienced, apt to be shaken, quite unnecessarily, as to the reasonableness of his own demands. The feeling that there is, after all, little or no difference between black and white is familiar to everyone who has been obliged in the course of duty to spend days at a time in discussing controversial subjects with Waziri jirgas. Frequently, however, this obstinacy defeats its own purpose, and a tribe bring down punishment upon their heads, or an individual involves himself in fine, imprisonment and other troubles, by a contumacious refusal to yield on what was, so far as any Waziri was concerned, a mere side-issue.

Another characteristic of Waziris, among the first to attract the notice of the stranger and among the last to linger in the memory of one who has known them, is the extravagant manner in which they exaggerate benefits conferred or services rendered by themselves, and the frequency with which they recur to them. It is related that a Waziri and a Bannuchi were friends, and that once, in an evil day for the Bannuchi, the Waziri presented him with a rafter for repairing the roof of his house. From that time forward the Waziri, who used like many of his tribe to attend regularly the Bannu Friday fair, began to visit the house of the Bannuchi every week, and quickly turning the conversation to the subject of the rafter he would praise its goodness and dilate on the trouble he had taken to cut it and bring it from the hills. In the course of a few weeks he rendered the obligation so intolerable to the Bannuchi that the latter snatched the rafter out of his roof, bringing the roof down, flung it at the Waziri's feet and requested him to remove both the wood and his own presence at once and for ever.

The high animal spirits which the Waziri undoubtedly possesses may be studied to advantage in the public dances held at certain fixed places in Waziristan upon the Id. The ceremony takes place on a smooth piece of ground, in the middle of which is planted a post to mark the centre of the movement. Round the post revolves to stirring music a dense crowd composed, it may be, of several hundred men dressed in holiday attire and nearly all armed with knife, pistol, sword or gun. The mass turns with the left sides of the performers towards the centre of the dance so as to give freer play to their sword-arms. Close to the pivot pass the old and elderly men, walking sedately; outside them circle the youths and the men in their prime, wild with excitement, waving their weapons and describing mad antics; while round the margin of the

(c) ketabton.com: The Digital Library

wheel, career the mounted men of the tribe with brandished lances, displaying their horsemanship. The agility and enthusiasm of the younger dancers is a sight never to be forgotten: as the music quickens some of them seem now and then to spring nearly their own height into the air, while others advance by a most graceful movement with a sword in each hand, raising the one and lowering the other alternately in time with the step of the dance. Unfortunately these dances are extremely dangerous on account of the high tension and loaded fire-arms of the performers. They generally verge from the very outset on the bloodshed with which they not infrequently end. So in 1897 a levy sepoy who was taking part in the Tappi dance slipped and fell, and his musket, discharging itself accidentally, killed one of the other dancers. The crowd precipitated themselves on the unfortunate sepoy and would, but for the intervention of a levy jemadar and some men of the 1st Punjab Cavalry, have stretched him out and cut his throat then and there according to tribal custom, for by Waziri "nirkh" a life must be paid for with a life even if the first be taken by accident. As it was, the cavalry party who rescued the man had to retire fighting and a barber belonging to the regiment fell into the hands of the Waziris and was killed by them. The writer was witness of a somewhat similar occurrence on the 22nd of April 1899 at a spot between the Khiddar Khel village of Ziarat and the Madda Khel village of Sheranni. The tribes are at deadly enmity, and the boundary between these two particular villages is disputed; notwithstanding this it is the custom to hold the rival dances within sight, and a very short distance, of one another. On the occasion in question the Khiddar Khels, perhaps three hundred strong, were seized by a sudden spirit of mischief and leaving their customary dancing-place rushed in a body to a piece of flat ground considerably nearer the Madda Khel border and began dancing defiantly there. Directly the Madda Khels, of whom there were about six hundred, saw what had happened, they broke off their dance and began to advance threateningly towards the Khiddar Khels. Two Madda Khel Maliks were sent to turn their fellow-tribesmen back, but failed and returned trying to minimise their failure to the Political Officer by saying that only a friendly joint dance was intended. A violent collision seemed inevitable; but by one of those unaccountable freaks to which the Waziri temperament is liable the two hostile crowds merged in one and danced together peaceably for half an hour. In fact the dance had broken up and the tribes were separating in perfect amity when a sudden volley was heard, confusion reigned for one moment, and the next the Khiddar Khels were to be seen rushing to the cover of their village, while the Madda Khels took up the best positions they could find in the neighbouring ravines. Then began on both sides a brisk fusillade, which lasted for

(c) ketabton.com: The Digital Library

about quarter of an hour, till some holy men came forth from their houses carrying Kurans on their heads and passing between the combatants put an end to the fight. Several men were wounded, but only one mortally; and some Khiddar Khel camels, which the Madda Khels had with great presence of mind raided during the brief continuance of the fight, were returned the next day.

Of the recklessness of the Waziri we have had several examples, and his animal vigour few will deny; but the question remains whether he possesses real courage, a quality that some authorities are disinclined to concede in his favour. It may be admitted at once that he has not that self-sacrificing courage which, to speak generally, seems almost a prerogative of the white man, though it is not inherent even in all European nations. The Waziri will not expose himself to danger in a quarrel except in so far as he considers the quarrel his own; and even in hostilities waged on his own behalf he shuns danger as far as possible, making it his main object to fight safely and to overcome the enemy by taking him at a complete disadvantage. This, however, is probably not due to fear, or if partly to fear, yet not so much to that feeling as to a sense that by giving the enemy an opportunity of killing or defeating him he is playing the enemy's game. The Waziri fears dishonour as much or more than death, and seeing no shame in flight or treachery he resorts to both, precisely in order to avoid what he considers the real disgrace of being openly worsted. In fact the Waziris in this matter present a remarkable parallel to the Navarrese irregulars who fought for Don Carlos in Spain thirty years ago, of whom Thieblin wrote*:—"This running away does not appear to them as anything objectionable. You cannot make them understand that it is a flight; in their eyes it is simply an escape by means of which they get the best of their enemy; 'for the enemy's evident intention was to slaughter a number of us,' would argue the Navarrese, 'and through our escape he got snubbed.' This view seems to be implied in their very language, for the process of withdrawing from the enemy's fire is described neither as *huir* (to fly) nor as *correr* (to run), but as *escaparse* (to escape, a verb neuter)." Spain may furnish yet another analogy to Waziristan one day. Now that the Waziris, especially the Mahsud tribe, are well armed with modern rifles, it is not improbable, should another military expedition against them be found necessary, that they would fight and that their tactics would very closely resemble those of the Spanish guerillas in the Peninsular War, described by De Ségur, the aide-de-camp of Napoleon, in these words:—"Like the Turks, whose defects and qualities they possess, these people can only defend themselves steadily from behind

walls; they do not hold their ground in the open, feeling no shame in turning their backs, scattering themselves and running to hide in their mountains. However, as they have nogr eat attachment for their miserable habitations, and live upon very little, if they take flight and find refuge in their rocks, they do not lose hope and abandon their cause, but they go there to multiply the warfare, to transform it into a succession of struggles on the enemy's flank and rear, which are all traps, surprises and assassinations." A Waziri brought to bay, however, will fight desperately: this seems to prove that he has no real want of physical courage, and it is a fact to be carefully borne in mind by anyone who may have to approach a wounded Waziri after a skirmish. The writer has seen a Waziri raider, powerless to escape and almost disabled who might have surrendered by throwing up his hands, shoot instead at his pursuers as they came up; when they had almost reached him, he made a second attempt to fire, but his strength failed and the rifle dropped from his grasp; he then drew his knife and with nerveless hands tried to force it into his own breast. Evidently this man disdained either to be killed by the enemy or to fall into their hands alive.*

We pass now from a review of Waziri character in the abstract to examine a few of those institutions and customs in which the character of the people most eloquently declares itself.

It will have been observed that in the foregoing remarks fanaticism has not been attributed to the Waziri, and there are excellent reasons for thinking that he is not infected with that distemper to any great degree. His religion is of an unemotional and materialistic cast, and he does not even comply with all the ordinary formalities of the Muhammadan faith, for, though he is fairly assiduous in his prayers and ablutions, he is not infrequently uncircumcised. Mullahs seem to exercise but little ascendancy over him; and those who, like the Mullah Powindah and the Mullah Amzullah, have some influence derive it rather from their position in politics than from their religious reputation. That the Mahsuds in 1898 not only slew Namdar, the Sheikh of the Bittannis, but also inflicted on him the further indignity of cutting off his head is enough to show how cheap Waziris hold sacred men when it suits their convenience. Some power, however, seems to be permitted to leading Mullahs for the purpose of doing justice upon criminals whose victims are destitute of natural protectors. Thus it happened that, when the Mullah Powindah was returning with a *lashkar* from the Gararai country about the beginning of 1899, his assistance was invoked at Maidan by a Mahsud widow who complained that her brother-in-law,

one Ashkar, wished to marry her against her will, and had slain her two sons because she persisted in refusing him; the Mullah is said thereupon to have destroyed with fire several houses belonging to Ashkar, but two of his following were burned to death in executing his orders. Again, to be a fanatical Muhammadan demands a certain amount of sympathy and intercourse with co-religionists, whereas the Waziri, as already shown, is the *bête noir* of his Muhammadan neighbours. For these reasons it seems at the present moment inconceivable that Waziris should ever undertake a holy war, pure and simple; and should they at any future time combine for such a purpose, it will probably be found that in reality either the hope of plunder or dislike of foreign intruders drew them to the standard of Islam, and that religion was nothing more than the rallying-cry. The Waziris have the same respect as ordinary Muhammadans for shrines and the graves of reputed saints, and make prayers and offerings thereat for protection and benefits which they hope to receive. Their other superstitions also appear to be simple and harmless, and though they admit the existence of fairies, genies and other supernatural beings they never allow their belief in such creatures to interfere with the practical affairs of life.

By no means secondary to the influence of religion upon any Waziri community is the influence exerted on it by the women. The relations of the sexes form in Waziristan a subject to which the attention of the Political Officer is frequently directed, for out of those relations spring many of the crimes and disturbances which trouble the country. The Waziri woman spends the greater part of her life in the open air and on hill-side, and performs almost as much of the hard physical work of the household as her husband, to whom she is often little if at all inferior in brute strength. This mode of life seems to engender a presence of mind, a fertility of resource and a wilfulness, which added to a rough but not unattractive appearance and to a distinctly immoral tendency,—too frequently exemplified in practice for its existence to admit of doubt,—make up a personality that readily becomes a dangerous focus of jealousies and dissensions. The frailty of the Waziri woman may be due to the freedom of her movements as a shepherd's wife in a thinly populated country or it may be attributed to the fact that she has no voice in the selection of her husband; but be the explanation of her misconduct what it may, there can be no doubt as to its fatal results. It would probably be no exaggeration to say that hardly a week passes in Waziristan in which blood is not shed on account of a woman, nor ever a month without a murder of which some mountain Helen is the direct or the indirect cause. A story told by Madd Akbar, chief malik of the Tori Khels, forms the second appendix of this book; if not true it is probably founded on fact, and it admirably

illustrates some of the most striking characteristics of the Waziri woman. If, however, wives in Waziristan are apt to be untrue and unscrupulous, husbands on their part are vigilant, suspicious and prone to jealousy in an extraordinary degree. Their vengeance is deadly and does not always wait for proof. The ordinary punishment of adultery is to put to death the woman and to cut off half the right foot of the man; or if the guilty parties are taken in the act, no objection can be raised according to custom if both are slain together. The number of men who have been relieved of a foot, by a neat slanting cut from the front of the ankle backwards and downwards to the heel, is astonishing; and in former days permanent pain and lameness was a common result. Now however these mutilated limbs provide young British surgeons in frontier posts with excellent opportunities of practising Pirigoff's operation, and many are rendered more or less serviceable again by European science. The unskilfulness and haste of the Waziri operators in a foot-cutting incident not infrequently cost the adulterer his life. In one Tochi case the friends of the aggrieved party suddenly invaded the co-respondent's house, where they found him lying on a bed and immediately surrounded him. The man was observed by some visitors seated in the court-yard to struggle and howl like one possessed, but none of them could see what took place or imagined it to be anything worse than friendly horseplay; not till two minutes later, when the strangers vanished as suddenly as they had appeared, did the visitors discover that their unlucky host had in the interim been deprived of a foot. The victim of this retaliation sank rapidly and died in a few hours. Two extracts from the Tochi Political Diary, an official but by no means prosaic record, will serve to illustrate the readiness with which in Waziristan deadly feuds arise out of the misbehaviour of women: —

"Before the British occupation of Daur, Mir Khan, Shogi Tori Khel, was suspected of being in love with the wife of Bori, the nephew of Zakam, Shogi. The woman's husband compelled her to poison her lover under threat of being herself put to death if she did not. On the 4th of March, in revenge for the death of Mir Khan, his father Idak, assisted by Ahmad Gul, son of Khoni, Shogi Malik, slew Bori at Dakai Khwula in Khaisor.—(*8th March, 1899.*)...On the 26th March Khoni, one of the chief Shogi Maliks, was assassinated at his village. He had just returned to his home from doing good service along with other Tori Khel Maliks at Datta Khel in connection with the Madda Khel settlement. He is said to have been decoyed by Guli, Shogi, to his house and there treacherously shot with a pistol. This murder was in retaliation for the recent death of Bori, a cousin of Guli, at the hands of Khoni's son and another.—(*31st March, 1899.*)

"About five months ago Gul Muhammad, Abdullai Mahsud, who was living with the Tori Khels in Sham, enticed away Slama, wife of Khanijan, Maddi Khel Tori Khel, and concealed her at Makin in the house of Abdullanir, Akhund. After a month the Tori Khels traced her and she was brought back to her husband. Khanijan went to Madd Akbar, Feroz Khan and Ghulam, Tori Khel Maliks. Gul Muhammad was sent for, and it was arranged that he should pay Rs. 250 to Khanijan, Rs. 100 to Idam, Slama's brother, Rs. 80 to Ding, cousin of Khanijan, and Rs. 10 to Nezam Din, Tori Khel Malik, and be given possession of the woman. Gul Muhammad paid the money to Madd Akbar and Khanijan divorced Slama, and Gul Muhammad would have started for home with her, but it was late and he stopped for the night at Idam's village. Pasal, a cousin of Khanijan, protested against the settlement, and said that the woman was an adulteress and should be put to death according to Waziri custom. On this Khanijan wished to give back the money he had taken from Gul Muhammad and cancel the arrangement, but the latter would not accept it and went away leaving the woman among the Tori Khels. The money was collected from the Tori Khels to whom it had been given and Gul Muhammad was sent for again. He arrived with a Mahsud jirga, one of whom was Gulbadin, Kikarai Mahsud. As Gul Muhammad still refused to take back his money it was paid to Gulbadin, less something which is supposed to have been embezzled by Madd Akbar. Six or seven days later Pasal shot Slama dead. Gul Muhammad is now trying to kill Pasal, and Pasal is looking for Gul Muhammad."

Another quotation from the Diary may be given to show the position of women in regard to tribal feuds, and how they are raided and counter-raided very much in the same way as sheep or goats—

"About the 13th of November three girls were carried off from Saroba in Khaisor. One of them, a daughter of Takhar Khan, has come back; the other two, daughters of Shekha and Haji Khan, Dirdonis, are still missing. The affair is one entirely of the unprotected area. The raiders are supposed to have been headed by Shpezhmai and Trezhmai, Jalal Khel, Mahsuds.—(*21st November, 1898.*).....About the 15th of December 1898 a gathering of about twenty-five Dirdoni Mohmit Khels, headed by Pila, Landak and Momit Khan, went to the Jalal Khel country and laid an ambush at the water-spring near the village of Malik Karim Khan. In the morning when the village-women came to fetch water from the spring the Dirdonis captured the wives of Ghaibadin and Mita Khan, brother of Aki Khan, Jalal Khel, and retraced their steps with the women towards their own country. On receiving the news the Jalal Khels turned out a pursuit party and pursued them as far as Iti Ziarat in Khaisora where a fight took place. The Jalal Khels returned unsuccessful, losing

Mansalam killed and Kashai wounded. The Dirdonis suffered no loss.—(*31st December, 1898.*).....The raid by the Dirdoni Mohmit Khels on the Jalal Khel Mahsuds.....was not unprovoked. The history of the case appears to be that one or more of the rifles seized by the Naib Tahsildar of Miram Shah in May...belonged to the Jalal Khel Mahsuds, and the Jalal Khels laid the blame of the loss upon the Dirdonis and attempted to recoup themselves by the raid on the Dirdonis, reported (in the diary of the) 21st November 1898. A few days before this raid the Jalal Khels had already given provocation to the Dirdonis by an attack on them..... in which a Dirdoni, Miraboz, was wounded, fatally as it turned out. The Dirdonis have now exchanged the Jalal Khel women captured by them for their own women and the death of Mansalam has been set off against that of Miraboz."

Waziri wives are said sometimes to accompany their husbands to the battle-field, and women were alleged to have been seen taking an active part in the attack on troops at Maizar in 1897. Fortunately not all the cases which bring Waziri women to notice are of such a sombre cast as the examples given above might lead one to suppose. The Political Officer in the Tochi had in 1898 to decide a case between a married couple in which the husband alleged that his wife had deserted him, and the wife that her husband had failed to respect a promise, made by him at the time of their marriage, that she should be allowed to choose the joint place of residence. The matter was referred to arbitrators, who settled that the household should pass the six summer months in the hills at a place selected by the wife and the other six at a place in the Tochi Valley approved by the husband. John Stuart Mill could hardly have criticised this decision as indicating an undue subjection of women.

We now approach the blood-feud, perhaps the most characteristic of Waziri institutions, though possessed equally by other Pathans, and the one which exhibits the Waziri in his real and darkest colours. The blood-feud endures not only because it is an ancient and well-established article in the code of frontier honour, nor only because social infamy and ostracism would attend the man who should attempt to evade its requirements, though these reasons are no doubt powerful factors in its continuance. To pardon the murderer of a near relative would be in the eyes of the Waziris of to-day what failure to accept a challenge to a duel was in the eyes of our own great-grandfathers. But there is a cause deeper than these. The blood-feud flourishes among Pathan tribes, and *par excellence* among Waziris, on account of its thorough congeniality to the temperament of the people. It is founded in their sensitive vanity, to which the repayment of an insult in a striking and public manner is an absolute necessity, and it is perpetuated by the Waziri principle that one man must never allow another permanently to get the better of him.

(c) ketabton.com: The Digital Library

That it has gone further and that revenge is regarded as a sacred duty or a moral obligation cannot with truth be alleged; for there is no doubt that it is prosecuted on absolutely personal, and not on unselfish grounds. The conduct of the blood-feud gives full exercise to those faculties of intrigue, strategem and dissimulation in which the Waziri excels, and its consequences excite no compunction in his cruel and callous breast. Its only drawback in his estimation is that it brings his own life into danger; and the anxiety suffered by a man who has several blood-enemies, forever spying upon his movements and waiting for an opportunity to attack him without risk to themselves, is often excruciating and may continue for years, being without remedy except his own death or the death of them all. The hunted look of the wretched *badidor* once seen can never be forgotten. Even in perfect safety his eyes through force of habit rove restlessly from object to object as if seeking a concealed enemy, and his mind wanders from the subject of conversation, probably to the dangerous places he must pass in returning home, or to schemes for throwing the pursuer off the track by a variation of route or an unexpected time of departure. The writer remembers an interview with one of these men, Zarkail, Khushali Tori Khel of the Tochi, which took place under the walls of the village of Barro Khel. Though close to the door of his house, surrounded by his friends and protected by the presence of the Political Officer, this miserable being not only insisted on keeping the breech of his rifle open ready to load and fire in case of a sudden attack, but in order to be able to reload more quickly he held loose cartridges clutched between the fingers of his left hand, and so continued throughout the interview, on the conclusion of which he precipitately retreated into his house. The mistake of supposing that every Waziri feud is a blood-feud must be guarded against. Properly speaking a blood-feud can only arise out of a death,* and it follows that in a chain of murders the first is usually brought about by an ordinary quarrel. Every injury, however, is liable to beget a blood-feud;† first, from the tendency of the parties to make in turn more and more severe reprisals on each other, and secondly, from the fact that death is often the easiest and sometimes the only possible form of retaliation—thus a husband

* In Waziri custom it is "murder" to kill a man even accidentally; but accidental "murders" can be, and generally are, compounded.

† Here is a case from the Tochi Political Diary of the 8th June 1893 in which a imaginary wrong led at one step to a blood-feud: "About the end of May, Kastirai, Kushali Tori Khel Malik, was murdered by Khangul, the notorious bad character of that section, who is wanted for the theft of two levy muskets from the Idak post.....It appears that Khangul suspected Kastirai of having given information against him in this case and of having caused the arrest of his brother. In this appeared the irony of fate; for not only did Kastirai not give the original information, but with others of the tribe he at first tried to screen Khangul."

may find it impracticable to overpower his wife's paramour in order to cut off his foot, while to shoot him in the back on a lonely road may be a comparatively simple matter. The following may be taken as an instance of a feud arising out of a very trivial matter: for all the writer knows it may, since he left Tochi, have developed into a blood-feud. A Waziri having been bitten by another Waziri's dog sent the owner an ultimatum demanding that the dog should be surrendered in order to be put to death by having its throat cut. The other Waziri, probably regarding the dog not only as his property but also as his "hamsaya," that is to say as a dependent whom he was bound in honour to protect, refused; the result was "badi." Any one who knows the country will perceive an inimitably Waziri touch in this story, first in the serious way the matter was handled by both parties and again in the sort of attempt made by the plantiff to create a quasi-tribal custom in regard to dogs, rendering them responsible for their actions even with their lives. According to theory any feud, even a blood-feud, may be settled otherwise than by retaliation in kind: the injured person or his relations, if he has been killed, may accept compensation in property or money according to a fixed scale established by ancient usage, or he may altogether remit the "por," that is, the obligation to make good the injury. The last mentioned course is seldom, if ever, adopted; but the former is commonly in vogue and leads to some, according to European ideas, extraordinary situations. Thus if an adulterer is not killed on the spot, but is murdered subsequently in cold blood, his relations have a valid claim against the injured husband for the excess in pecuniary value of a man's life over a married woman's honour, a considerable sum. A settlement otherwise than by successful retaliation is never to be relied on in cases where death has been caused intentionally. When money compensation is accepted for a life it is generally with the design of lulling the murderer's relatives into a false security and of inducing them to abate their precautions in order that one of them may be the more easily murdered in return. The strange thing is that a Waziri, marked down for vengeance in a death case, should ever delude himself into the belief that he has made his life safe by means of a money-payment; the frequency of instances in which claimants take a man's money first and murder him afterwards show trust in such circumstances to be the merest folly. A Waziri of good principles is supposed always to spurn the offer of money compensation for the murder of a relative, and a Madda Khel of the Kazha, the case of whose father's murder had been taken up authoritatively and was about to be settled on the basis of customary compensation, respectfully but in a voice trembling with emotion, assured the Political Officer that he would rather consent to instant death than give his word of honour to abide by such a settlement. The most hopeless kind of blood-feud is one that

(c) ketabton.com: The Digital Library

originates in a murder, the perpetrator of which is not certainly known. Thus, if B kills A and A's relatives thereafter succeed in killing B, the blood-feud is in theory at an end, and in practice sometimes but not always ceases. But if A is found dead and his relatives kill B on mere suspicion of his being the murderer, B's relatives, if they do not admit the suspicion to be correct, are then entitled to kill one of the relatives of A on account of the murder of B, which is in their view unjust. Again the relatives of A, adhering to their original opinion, can kill another of B's party to make the account balance, and so the sanguinary game continues from generation to generation. Such a case cannot be stopped at all except by the extinction of near male relatives on one side or the other or by the intervention of Government or by a coalition of tribal authorities which latter is rare in the case of a private feud. As murderers take great pains to conceal their identity, many of the blood-feuds in Waziristan are of this interminable nature. It is needless to comment at length on the vitality of the Waziri vendetta, for it is amply illustrated in two or three of the following examples taken as usual from the Tochi Political Diary. In one case it will be seen that the feud was revived by a fresh murder after it had lain dormant for forty years. These extracts from the Diary also bring into prominence the facts that neither high position in the tribe, employment under Government, death of the original disputants, nor even a formal settlement or reconciliation are any safe-guard in Waziristan against the avenger of blood :—

"It is reported that Pash and Chal, sons of Landun, Khushali Tori Khel, and Nasar and Bohtan, his nephews, have severely wounded Sadulla Khan, nephew of Kippat Khan, leading Mohmit Khel Malik, with swords at Razmak (unprotected area). The reason is said to be that eight or nine years ago at Razmak, Sadulla attacked Landun (since dead) with a sword, maiming him for life. Landun was at the time in a Mohmit Khel village on a friendly mission from his tribe.—(*7th September, 1898.*)

"On the 19th January a stranger arrived at the village of Chiton in Hamzoni and introduced himself to Gulzar and Shahzar, sons of Said Shah, Malikshahi Mahsud, residing in the village, as a relative who had come to enquire after the welfare of the family. After evening prayers at the mosque the stranger went with Shahzar to a water-channel near by where he stabbed him in the chest and then disappeared. Shahzar only lived long enough to describe what had happened. The stranger is supposed to have been a Mahsud of the family with whom the deceased's father had the feud that was the cause of his settling in Daur.*—(*23rd January, 1899.*)

* This was a peculiarly tragic case. The father of the murdered man had removed from the Mahsud country forty years before and was himself dead ; his wife was a Dauri woman

"On the 10th September Mihr Dad, Macha of Tauda China, was murdered on the Kuk Narai in Kazha. His brother Wali Dad accuses certain Ismel Khels. Wali Dad killed an Ismel Khel some years ago, and though he lately paid up part of the blood-money under the orders of the Political Officer, and had promised to pay the rest, the Ismel Khels were apparently unwillingly to forego their revenge.—(*21st September, 1898.*)

"It is reported that about the 24th or 25th of February Mirdad, Ghazm Khan, Asal Din, Takhti Khel Bakka Khels, and another man of the same tribe visited the Wruke Jani Khels of Senr (unprotected area) in connection with a dispute about land in Shawal. Asal Din and Mirdad, are deadly enemies. Ghazm Khan is a friend of Mirdad and the fourth member of the party was a friend of Asal Din. In the evening, as they were going to a mosque, Asal Din suddenly shot at Mirdad from behind with a pistol but missed him. On this Ghazm Khan fell upon Asal Din's companion and stabbed him in three places, himself receiving a bullet wound in the left hand from his adversary's pistol. The Jani Khels separated the combatants, and it is not thought that any of the latter will die of their wounds. It is believed that the whole expedition to Senr was planned by Asal Din with the object of obtaining an opportunity to kill his enemy.—(*28th February, 1899.*)

"It is reported that Umr Khan, Marsanzai Mahsud, has been murdered in his native country on account of a blood-feud. He had been living for some years at Idar Khel in Lower Daur and had married and acquired land there, but was recently persuaded to go through a formal reconciliation with his enemies and revisit the Marsanzai country. He had gone this time to collect Rs. 200, the remaining price of land sold by him: he had already collected Rs. 400 on a former visit to his home.—(*21st November, 1898.*)

"On the evening of the 11th Awwalai of Isore in Lower Daur was shot from behind while saying his prayers in one of the village mosques and died on the spot. The other worshippers raised hue and cry at once, but the murderer was not found. Awwalai is supposed to have been killed by some relative of an Abdullai Mahsud, who was murdered about six years ago and whose death was attributed to him. The supposition is strengthened by the fact that a strange Mahsud, who had been hanging about the village for some days, has not been seen since the murder, and that the murderer, whoever he was, left his pistol at the place he fired from, which is the customary sign of successful revenge and the feud being ended thereby.—(*14th May, 1898.*)

and his children, including the victim, were to all intents and purposes Dauris not Mahsuds. The stranger was well received by the family, who probably knew nothing of the feud. Shahzar expired naming the sum to be distributed in alms at his own funeral.

"Before Government occupied the Tochi the late Husen, Bobalai, a famous Tori Khel raider of the Ketu, killed one Mihrwan and looted a mare and two breech-loading rifles belonging to him. Mihrwan was nephew of Badde, a fakir of considerable repute in the Ketu and in part of the Tochi. Badde bribed Nafadar, Shahmiri Tori Khel, to kill Muhabat, son of Husen, in retaliation, which he did. On or about the 3rd of November, Nafadar, who had placed himself under the protection of Payao, Hassan Khel Malik, was stabbed dead by Mir Akbar Khan, Hassan Khel, at the instigation of Makhmad, brother of Muhabbat and son of Husen.—(*7th November, 1898.*) . . . . Some events are reported from the Ketu the meaning of which is not yet apparent. It is said that about the 27th of December 1898 Yar Muhammad, Fatti Khel Hassan Khel, was shot dead by Gulak, Saifali, at the instigation of Payao, Hassan Khel Malik, whose *hamsaya* Gulak was. This is the Payao who is accused of having caused the death of his fellow Malik, Zarmalik, by poison. It is added that about the 8th January 1889 Gulak abducted the sister of the late Zarmalik and brought her to the village of Niazai, relative of the late Husen, Bobalai Tori Khel, further down the Ketu.—(*15th January, 1899.*) . . . . The murder of Yar Muhammad is said to have been instigated by Payao, Hassan Khel Malik, in retaliation for the murder of Nafadar, Yar Muhammad being a relative of the assassin of Nafadar. The sister of Zarmalik appears to have been given by Payao in marriage to Gulak as a reward for his share in the transaction.—(*23rd January, 1899.*)

"On the afternoon of the 7th December Muzammil Khan, nephew of Sadda Khan, Madda Khel, and Levy Jamadar of the Maizar post, was shot dead at Sheranni by Saidwali, whose surrender was demanded by Government in connection with the Maizar outrage. The motive is believed to have been revenge for the seduction by Muzammil Khan of Saidwali's wife some time before the Maizar outrage.—(*7th December, 1898.*) . . After the murder of Muzammil Khan Saidwali took refuge in the adjoining Khiddar Khel village of Ziarat. As it was expected that he would remain there the night, the Military authorities at the request of the Political Officer sent troops to Ziarat before daylight the next morning to arrest him, but before their arrival the Khiddar Khels had made over Saidwali to the relations of Muzammil, and the latter had killed him.—(*15th December, 1898.*) On the 27th of January Nasarka, Khizar Khel of Sheranni was shot dead in the hills to the north of the Tochi. His family had an old feud with Sadda Khan's relations. Mamat and Zarim, nephews of Sadda Khan, are said to have damaged Nasarka's crops last year and Dande, brother of Sadda Khan, to have paid compensation to Nasarka. When Muzammil Khan, brother of Mamat, was shot by Saidwali, Dande Khan accused Nasarka of having conspired with Saidwali to do it, and Nasarka is now believed to have

been killed by Mamat as a further set-off against the death of Muzammil Khan.*—(*8th February, 1899.*)"

It should not be hastily concluded from the above examples that the Waziris are wantonly barbarous, and it is with some hesitation that the writer has gone so far in an earlier paragraph as to call them cruel. Torture is unheard of among them, and men to be killed are promptly and efficiently despatched. Mutilation of the dead is probably never committed except by individuals under the influence of fanaticism or of some violent passion.† But while the Waziri does not revel in causing pain, he shows the utmost indifference and want of consideration in inflicting it. He holds all human life cheap and will kill a child or a woman with as little compunction as he would a man, and a near relative almost as readily as he would a stranger. The following are instances of Waziri inhumanity taken from the Tochi Political Diary :—

"On the 8th of June Sarwar Khan, Nazr Khel, shot and killed his his uncle Abdulla at Zeri, above Wucha Bibi, but in British territory.—(*14th June, 1898.*) . . . . A quadruple murder is reported to have occurred at Sanzalai in Kazha on the night of the 19th—20th January 1899. The victims were Sarwar Khan and Gulai Khan, Nazr Khels, brothers, their mother Khari, and Nadona, the wife of Sarwar Khan. Sarwar Khan is said to have been killed in revenge for the murder of Abdulla . . . . , Gulai as a set-off against a Tani of Bibi named Midagai, who was killed by Sarwar Khan and Abdulla before they quarrelled, Khari because she was the sister of Nazrdin who murdered a niece of Gulreb, Nazr Khel Malik, and Nadona because Abdulla once abducted the wife of the brother of Khadim, Malik of Pashai. Even if the above account is true, it is probable that the 'pors' were not arranged as above until after the family had been destroyed by the particular enemies of Sarwar Khan.—(*8th February, 1899.*)

"On the night of the 24th—25th January 1899 Juma Khan, son of Shahzaman, Khoji Khel Madda Khel, a child of eight years old, whose father is dead and whose mother has remarried, was killed in his own house at Sarkili, Maizar. The murder seems to have been committed with swords, but there is as yet no clue to the murderers.—(*31st January,*

* Sadda Khan, the uncle of Muzammil Khan, was until June 1897 the head of the Madda Khels and perhaps the most important Waziri Malik in Tochi, but this did not exempt his family from the dangers of a common-place feud. As a matter of fact Saidwali's wife was not seduced by Muzammil Khan and Saidwali consistently refused to put her to death. The matter was one of criminal assault only, and according to Waziri custom Muzammil Khan's nose should have been cut off. Saidwali being unable to enforce the proper penalty was obliged to go further and shoot Muzammil instead.

1899.) . . The murder of Juma Khan . . is now stated to have been committed by his cousin, Mir Salam, and the motive to have been succession to the boy's property.—(*8th February, 1899.*)

"About the 18th of May a gang of Jalal Khel Mahsuds headed by Machi Khel murdered Zarif, a Tori Khel of the Ketu. It is said that Machi Khel shot him in broad daylight as he was climbing a tree and declared the murder a set-off against the death of his brother Bade Mir, who was killed by men of Zarif's section some years ago."

In concluding this sketch of the life and character of the Waziris it only remains to touch on their favourite and most honoured occupation, one that is dying hard and will not soon go out of fashion among them, to wit the art of robbery whether by skill or violence. The expertness of the Waziris in possessing themselves of each other's moveables and of the moveable property of strangers is a never-ending marvel to those who have to do with them. As thieves, especially by night, they are probably unsurpassed; and as raiders working over a wide and difficult country they display incredible generalship and foresight. They usually fall upon their victims unexpectedly in a prepared place where no interruption is to be anticipated and to which neither notice nor help can be quickly attracted, and again in their retreat they often manage to secure such a start of their pursuers as not to be overtaken, unless encumbered with cattle, even by a pursuit party of their fellow-countrymen. When retarded by stolen animals they will divide into several parties, each driving a share of the booty in a different direction: the pursuers are, as a rule, unable to follow up more than one or two of these parties simultaneously and the others thus escape unpursued. The retreat of each party is protected by some of the best men in the gang, who hold every point of vantage against the *chigha* while the cattle or sheep and goats are being hurried away behind them; in favourable ground, or if the *chigha* is badly armed, it is not infrequently repulsed altogether. It is difficult to know whether to admire the thief or the raider most. Gulbaz, Khushali Tori Khel, since hanged for a similar but less successful attempt at Saidgi in which he mortally wounded a sepoy, was a fine example of the first. One dark rainy night he entered the Miram Shah post by climbing over the wall between two sentries; he spent a considerable time inside the enclosure and deliberately investigated its contents though from time to time accosted by inmates; finally he decamped towards morning with a rifle selected from the tent next the guard-tent. As raiders, a party of Mahsuds who visited the Afghan province of Khost deserve an honourable mention; after seizing their plunder in a hostile country some 40 miles from their own border they brought it safely home across the whole breadth of Tochi, without opposition or detection, passing at night with a herd of 200 raided cattle almost

under the walls of the principal Government post in the valley.* The success of the Waziris as robbers is due largely to their excellent arrangements for obtaining information, both of opportunities for doing a stroke of business and of the best and safest means of utilising them. This fact should not detract from their exploits, not at least in the eyes of Englishmen, whose failures all the world over may often be traced to their inability to obtain prompt and correct news of what goes on at even a short distance from them. It is a curious thing that men between whom there is no mutual confidence, but sometimes on the contrary reason for deep distrust, will engage together in a raid and temporarily place their lives in each other's hands: witness the following extract from the Tochi Political Diary which, though it refers to Kabul Khels, is typical of all Waziris :—

"It is reported that a short time ago, Sarwari, Malik of Biland Khel, was found dead in the hills. It is stated that two days before this he was decoyed away from his village by Gulmal, Niazai and Masaid, Miamais, cousins of Rahmat Shah, who invited him to join them in raiding the Thalwals. These men are supposed to have obtained possession of Sarwari's rifle while out with him and to have shot him with it, but they do not admit the murder.—(*10th January, 1899.*)"

The absence, at times at least, of honour from among Waziri thieves is illustrated in another passage from the Diary of the same date :—

"The death of Gulabagh, Gangi Khel Malik, is reported from the Dana (unprotected area). It is stated that with the connivance of a Kharoti and the help of Abdur Rahman Khel Mahsuds, Gulabagh some time ago raided flocks belonging to Kharotis. When the Kharoti accomplice came to demand his share of the loot, Gulabagh told him that he must bring the owners of the flocks with him to pay the ransom money and he would then receive his share. This made the Kharoti suspect that Gulabagh intended in the end to cheat him, and under the pretext of bringing the owners he brought two Kharotis with him on his next visit to Gulabagh. The three Kharotis set upon Gulabagh and stabbed him to death with knives at his tower, which is situated in a lonely place."

As the materials collected for this sketch do not happen to include a description of a successful raid, the reader must be satisfied with the account, from the raiders' point of view, of one which ended in a fiasco :—

"In revenge for the raid committed on Mohmit Khel flocks near Idak on the night of the 5th August 1898 . . . . . a counter-raid

* Since the above was written the Mahsuds have thrown all their previous achievements into the shade by the surprise of the Kashmir Kar Militia Post in August and the cutting up of a Survey military escort on the Khwuzhma in November 1901, both without loss to themselves

on the Jalal Khel Mahsuds was attempted by Gulámad Khan, son of Kippat Khan, with 18 fellow-tribesmen. Starting from Razmak they spent the first night near Musakki in Khaisor and the next in the hills adjoining the Jalal Khel country. The following day the Mohmit Khels succeeded in seizing a number of Jalal Khel cattle and drove them off. The Jalal Khels pursued, and there was heavy firing on both sides. One Jalal Khel was seen to fall as if shot. Abdullais and other Mahsuds, near whose encampments the Mohmit Khels had to pass on their way home, turned out and joined the Jalal Khels. The road was difficult and there was bright moonlight, which was unfavourable to the raiders. Finally, the ammunition of the Mohmit Khels running short they had to abandon the cattle, and returned to Razmak with only one bullock which had been taken and sent off before the other cattle."

No account of the inhabitants of Waziristan would be complete without at least a passing reference to the Dauris, who possess and cultivate the greater part of the bed of the Tochi Valley. They are a homogeneous tribe of considerable size, and though surrounded on all four sides by a Waziri population they bear little resemblance to Waziris. Their pursuits are even more exclusively agricultural than those of the Waziris are pastoral; they do not change their place of abode; and their lives are easy, not to say luxurious, in comparison with those of their hill-neighbours. Their position is a peculiar one, for they thrive on a rich sedimentary soil, copiously irrigated, in the midst of a country where cultivable land of any kind is scarce and water in general hardly to be obtained. But they pay a heavy tax in health and well-being for the possession of their fertile acres. Fevers and other malarial diseases are bred in the wet sodden lands of Daur lying, as for the most part they do, at the bottom of a deep depression, exposed to the direct rays of a burning sun; and the effects of these ailments may be clearly traced in the drawn or bloated features and the shrunken or swollen limbs of nearly every Dauri who has passed middle life. It is probably to the struggle against climate that the prevalence of intemperate habits among Dauris is due; but, whatever the reason, the percentage of Dauris who habitually take charas, bhang and similar intoxicating drugs to excess is phenomenal. Climate and intemperance together must have largely contributed to make the Dauri what he is; to the one may be attributed his indolence and apathy, to the other his want of mental balance, his paroxysms of frenzied excitement and his unnatural vices. Of the last nothing can be said here except that their universality and their recognition by tribal custom suggest the idea that they date from pre-Muhammadan ages and that they may be, so to speak, more than a purely fortuitous relaxation of ordinary human morality. Their monstrous power can be sufficiently indicated by the remark that a certain legendary Dauri is reputed

(c) ketabton.com: The Digital Library

almost a hero because, in order to gain the favour of an admired Ganymede, he cut the throat of his own mother instead of sacrificing the usual sheep prescribed by custom. The proneness of the Dauri, in spite of his usual passivity, to outbursts of wild and sometimes unprovoked fury is closely connected, beyond a doubt, with his generally morbid and depraved tone of mind and body. In 1899 a levy sowar struck a village Hindu at the Id festival at Hakim Khel in Lower Daur, and was thereupon hotly pursued by the whole assembly who in the heat of the moment regarded the blow as an insult to themselves. He escaped with his life though chased by one mounted Dauri armed with a lance for several miles, up to the very gates of the Idak post. It is noteworthy that by the time Idak was reached the Dauri pursuer's excitement had so far evaporated that he allowed himself to be arrested without resistance and seemed at a loss to explain his own conduct. The Dauri is not without a tincture of religion; he enjoys listening to the disputations of Mullahs and himself frequently becomes a student of theology. From this it follows that his homicidal mania not uncommonly runs in a fanatical channel, and it is a significant fact that, of the rather numerous fanatical outrages which have occurred in Tochi since its occupation in 1895, hardly any have been committed by Waziris and nearly all by Dauris. The Dauri, certainly no less dirty in person and habits, is probably more unscrupulous and more indiscriminate in his revenge than the Waziri; and the writer remembers a case in which a Dauri of Banda, wishing to poison a private enemy, unfeelingly caused arsenic to be placed in a drinking vessel at a place of public resort with the result that one man died and eight became dangerously ill, most if not all of whom had no connection with the quarrel. Having said thus much of the Dauri's worst qualities, it behoves us to give him credit for the virtues which he does possess. He is of a milder and less truculent disposition than the Waziri, more docile and amenable to civilisation; and the steady attendance at a primary school opened some two years ago in Lower Daur shows that he is not insensible to the benefits of education. The best type of Dauri is quiet, intelligent and law-abiding, and there is room for hope that this type will gain ground now that Daur has been opened up by the British occupation. There are some interesting men among the Dauris; and, though as a tribe they are by no means reputed courageous, examples of undoubted courage are to be met with among them, but chiefly in Upper Daur where there is a strong infusion of Waziri blood. The professional bullies or "spois" who used in pre-British times to be kept by Dauri leading men and even villages for the purpose of fighting their quarrels were oftenest perhaps broken Waziris who had drifted down from the hills in search of a livelihood, but among them were also many genuine

(c) ketabton.com: The Digital Library

Dauris. Though indolent in other matters the Dauri is an indefatigable cultivator; the whole of his land, with a few exceptions in Lower Daur, is dug by spade to a great depth instead of being ploughed and is carefully manured, but a Peshawar zamindar will condemn Dauri cultivation as slovenly in the matter of weeding and in some other respects. Perhaps as a consequence of his heavy field labour the Dauri enjoys a great reputation as a trencherman, and it is related of a certain Malik of Tappi (who shall be nameless), that he once on a mere invitation to partake, devoured without assistance the meal which had been prepared for three persons by a Native official of Government and two orderlies.

The Waziri despises the Dauri and affects to believe that all Dauris are sprung from one of the menial castes; but the fact remains that though villages may have occasionally been destroyed or temporarily wrested away, no Waziri combination, however far-reaching and numerous, ever succeeded in retaining possession of a part of Daur for any length of time. The greatest struggle between Waziris and Dauris was waged on the extreme western boundary of Upper Daur where it was the object of the Waziris during more than one generation to seize Ghazlamai and Pai Khel and so obtain command of the whole water-supply of the Mlakh Dauri villages. About the middle of the nineteenth century a vast Waziri coalition was formed with this object, embracing even the Ahmadzais of Bannu, and it achieved a temporary success. Ghazlamai, a village of Pirs, and Pai Khel, a Dauri village proper, were occupied by the Waziris, who held the latter for rather more than a year, by means of a contingent to which each Waziri section contributed a fixed quota of men. The Dauris finally consented to negotiate and appointed a place in Lower Daur for the meeting of their elders with the Waziri jirga. When, however, the latter arrived at the conference they were made prisoners and informed that their lives would be forfeited unless Pai Khel were evacuated instantly. Compliance with the Dauri demand was inevitable and the unparalleled exertions of the Waziris during the previous two years were thus rendered fruitless. The explanation of the non-success of the Waziris in their assaults upon the less warlike and much smaller Dauri tribe is to be sought in the patience, tenacity and comparative unity of the latter, and also in their central and compact position. Tribal warfare is a waiting game, and while the besieging Waziris were drawn often from great distances and maintained co-operation with the greatest difficulty owing to jealousies among themselves, the interruption of their ordinary pursuits and their impatience of the summer heat in Daur, the Dauris lived quietly in their own villages cultivating their crops so far as they could, repelling assaults in force from the cover of their walls and towers, ever ready to lend support to neighbouring villages when threatened and equally on the alert to take

(c) ketabton.com: The Digital Library

advantage of a momentary want of vigilance on the part of the enemy. It is hardly wonderful that in these circumstances the fickle and disunited Waziri tribes should have failed to effect a permanent lodgement in Daur. With the advent of the British power the ancient struggle ended and the waving green corn-fields and leafy mulberry groves of the best parts of Tochi will not now cease to own the Dauri for their lord unless the Waziri can succeed in ousting him by purchase and mortgage as in some villages, strange to say, he appears able and disposed to do.

If the reader closes these pages having gained a distinct impression of the race, free-born and murderous, hot-headed and light-hearted, self-respecting but vain, which peoples the hills of Waziristan, and of the gross Satyr-like spadesmen whose abode is in the main valley, then the present slight sketch has been penned to some purpose. Furthermore, if the reader quits the subject with relief, his feelings will only resemble those with which the writer relinquished political charge of the Tochi after a two years' residence there, and the cause will probably be the same,—involuntary abhorrence of human types which deviate in such an extreme degree from what Europeans are accustomed to consider the human standard.
